# VISION 46. THE YACHT.

## The New Vision Line's Development is based on:

1. Excessive Customer Clinics in a market research program: End-Customers actually told Bavaria how they see „their modern Cruising Yacht“ as a today's owners yacht.
2. Based on this Bavaria has specified the genes of the new line parallel to the existing Cruiser Range aiming for new market segments & shares in the “Owner Market Segment”:
  1. Classic Modern
  2. Special care for Comfort:
    1. Unique Cockpit Living Area & features
    2. Unique Cabin Living Comfort & features
  3. Easy to handle (featuring UNIQUE benchmarks)
  4. New production ways for the product
1. New Interior & Exterior DESIGN partnership with DESIGN UNLIMITED
2. Well-known and established boat performance & structure ENGINEERED by FARR YACHT DESIGN

## Resulting in:

# VISION 46. ... such external views and...

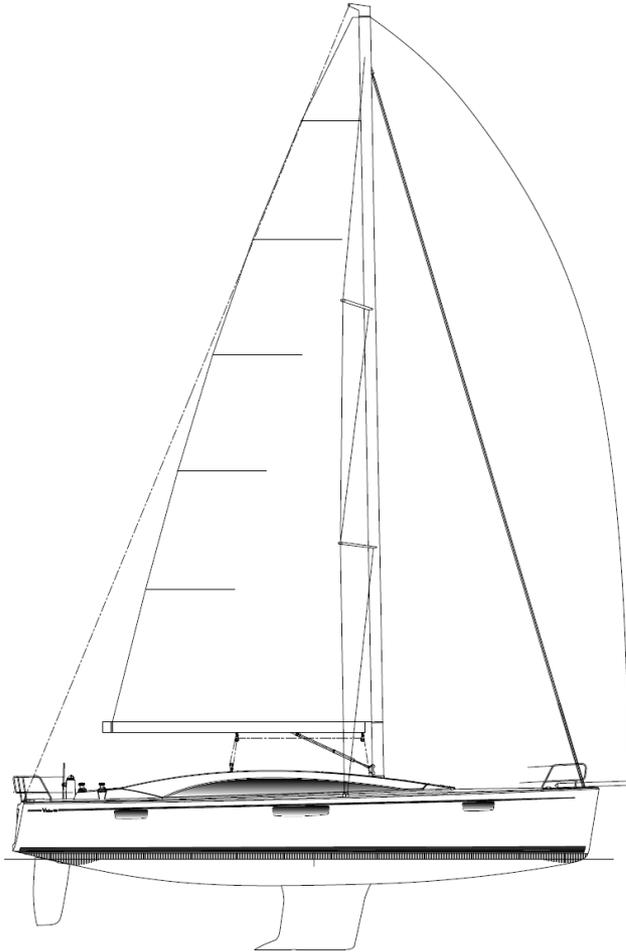

## VISION 46. ... luxurious internal views!

# FACTS. New Vision v/s Competition.

VISION 46	Competition	PRO Bavaria
9 Flush Hatches	Jeanneau 45DS = 3 Hatches Sense 43 = 8 Hatches	Best possible deckventilation
Big Sidewindows featuring integrated Opening Sections	Jeanneau 45DS = None Sense 43 = Portlights screwed in acrylic (leakage)	Safest & sexiest possible crossventilation of main cabin
Headsail Furler recessed in Anchor Locker	Jeanneau 45DS = Above Bow Roller Sense 43 = Above Bow Roller	Sexiest Foredeck
Optional electric Cockpit Table switched at port pedestal	Jeanneau 45DS = No Option Sense 43 = No Option	<b>Unique</b> (optional) comfort feature
Designated Lounge Cockpit	Jeanneau 45DS = No Sense 43 = Not as detailed	Most comfortable Cockpit Concept
Rocksolid swim platform linked with s/s wire rope	Jeanneau 45DS = No designated fold down platform Sense 43 = No designated fold down platform	<b>Unique:</b> Safety due to closed aft cockpit while on sea - best possible swim comfort, no flexing when stepping on
Swim ladder sidemounted in platform	Jeanneau 45DS = Classic (& long) fold down ladder Sense 43 = Longitudinal pull out type ladder	<b>Unique:</b> Perfect to moor the dinghy without blocking the swim ladder
Shower post integrated in byway lid astern	Jeanneau 45DS = Classic handheld showerunit Sense 43 = Classic handheld showerunit	<b>Unique:</b> Most comfortable Shower Concept
<b>DOCK CONTROL</b> - Full Monitored System	Jeanneau 45DS = 360 Docking Sense 43 = Dock & Go	<b>Unique:</b> FULL MONITORED SYSTEM of status & condition on chart plotter. Approved reliable components. Less possible moving parts. Number of safety features. Eliminates also mechanic engine control. No too slow moving pod!
<b>TACK CONTROL</b> - Push Button Auto Tack	EXCLUSIVE	<b>UNIQUE FEATURE for the world market!</b> Push Button Superyacht Feeling on a production yacht!

# LAUNCH TOUR. 2/1 – Layout Boat #1.

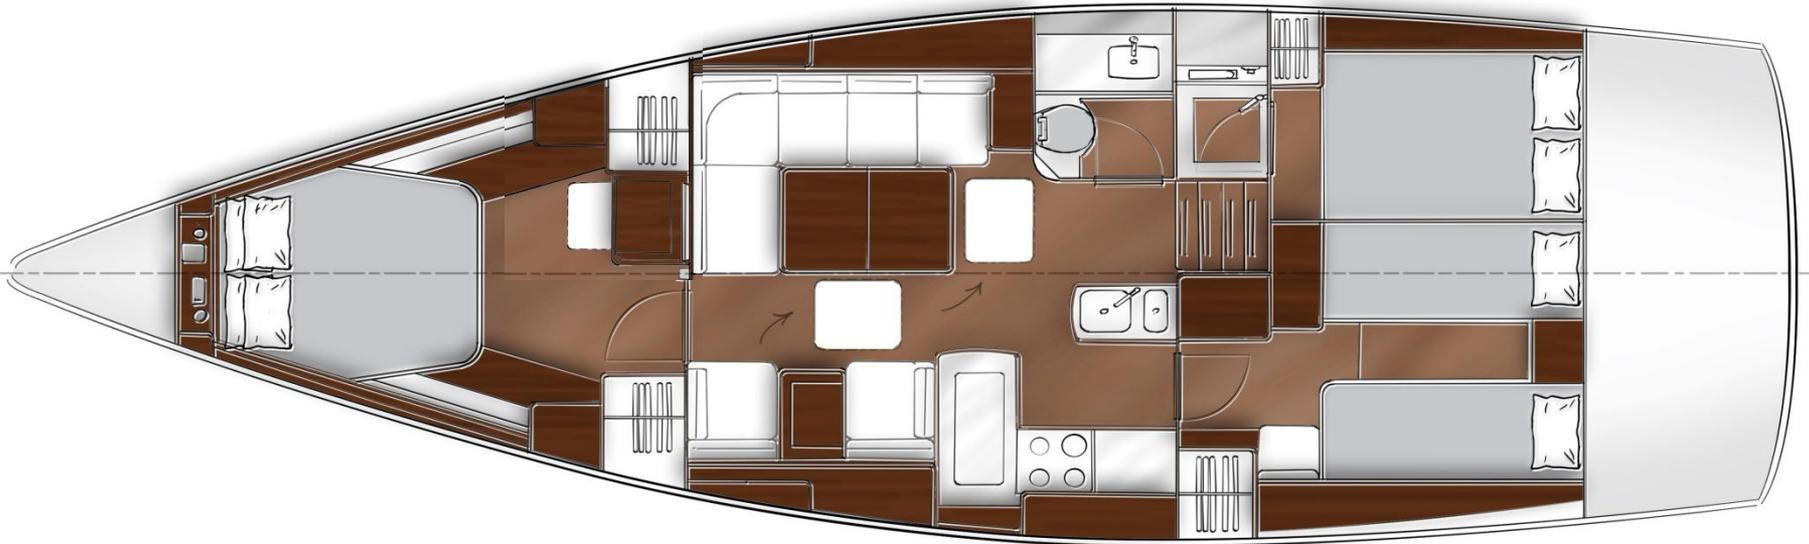

# LAYOUT. 2/1 - Standard.

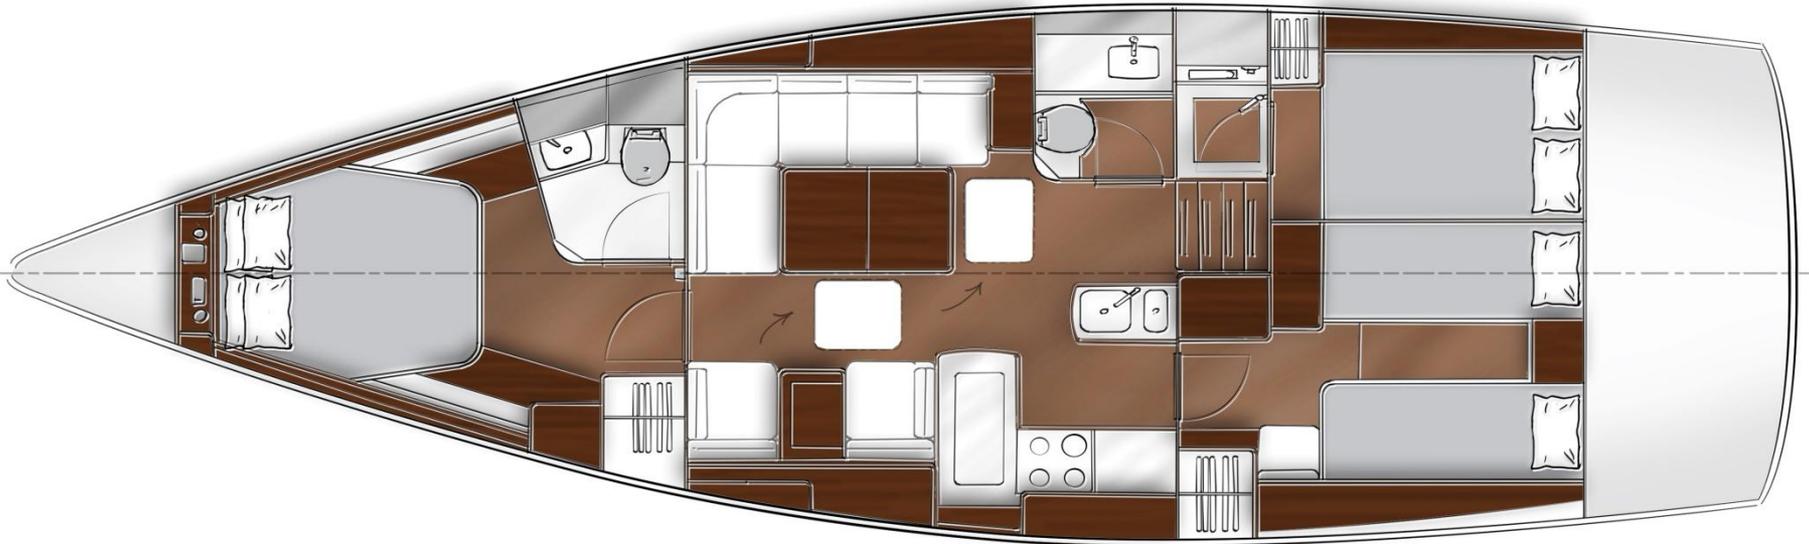

# LAYOUT. 2/2 - Optional.

# LAYOUT. 3/1 – Optional.

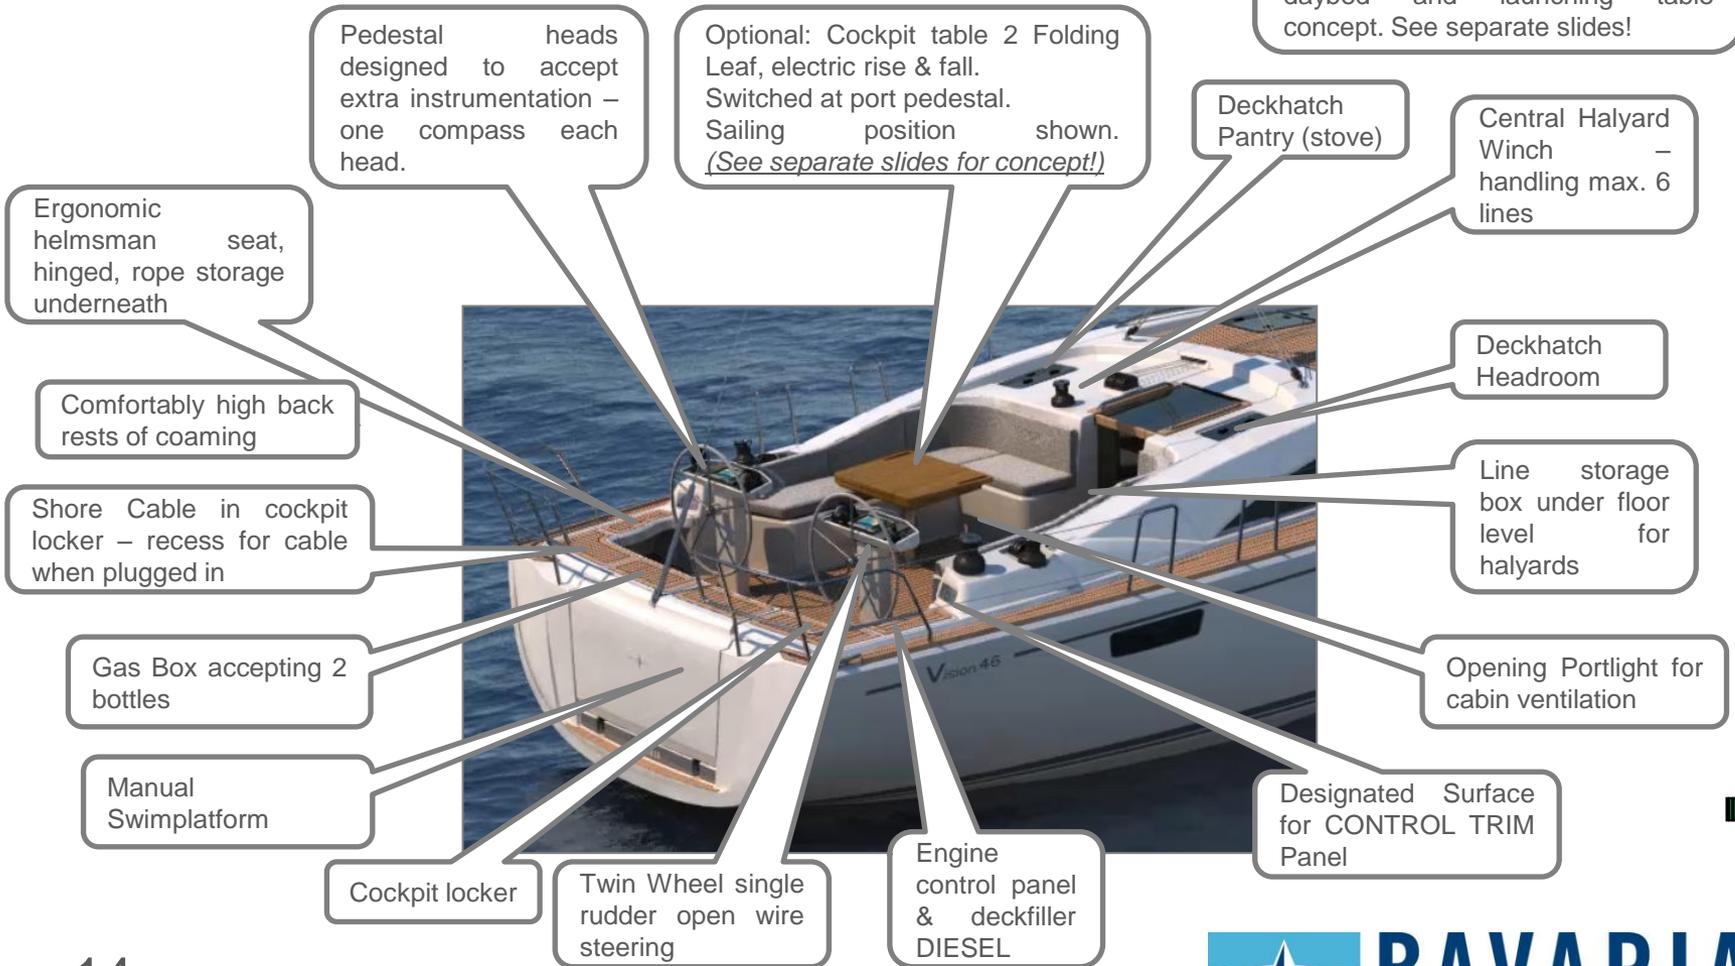

# LAYOUT. 3/2 – Optional.

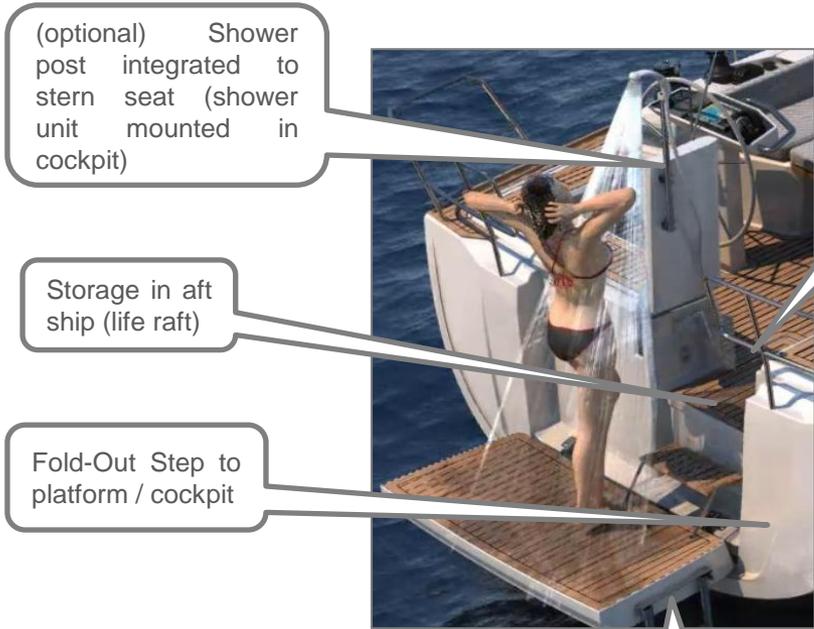

# LAUNCH TOUR. Cockpit #1.

**Basic Concept:**

Luxury cockpit layout for single handed boat handling & (optional) daybed and launching table concept. See separate slides!

# LAUNCH TOUR. Cockpit #2.

(optional) Shower post integrated to stern seat (shower unit mounted in cockpit)

Storage in aft ship (life raft)

Fold-Out Step to platform / cockpit

Lid to rudder stock for emergency tiller

Swim Ladder side-mounted – slide-out

Cockpit table folded out – Dining Table.  
Optional electric Rise & Fall Table for lounging & daybed in cockpit (see separate slides!)

Optional Lounge Seats

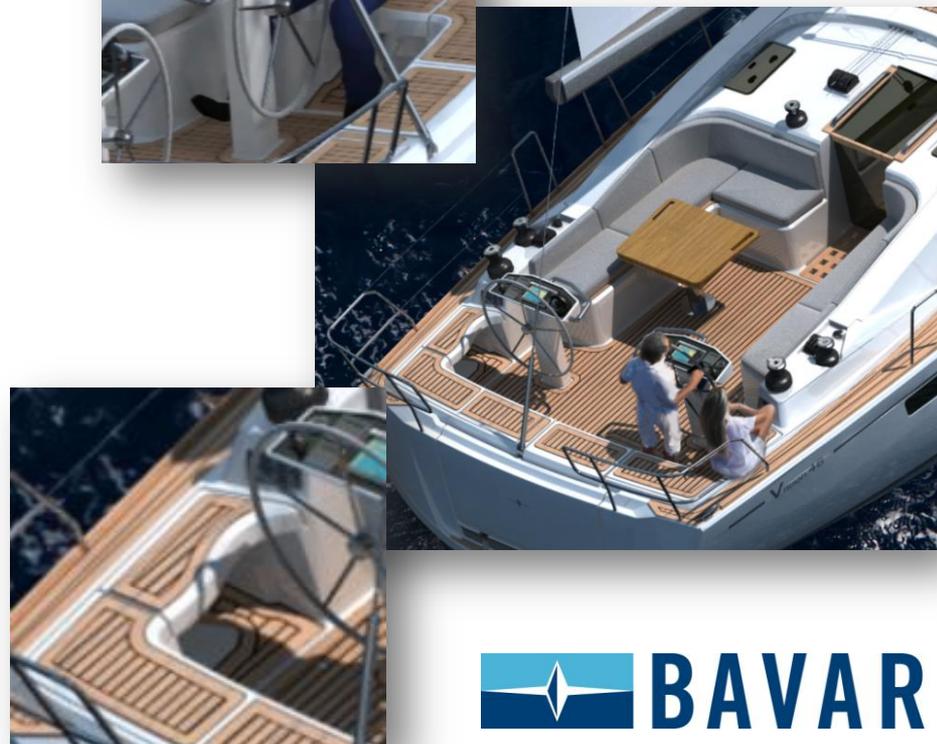

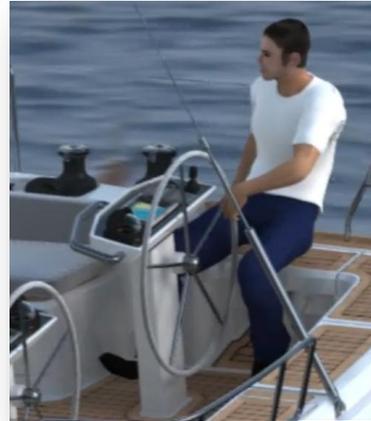

# LAUNCH TOUR. Single Hand Sailing Cockpit.

## SINGLE HANDED SAILING ?

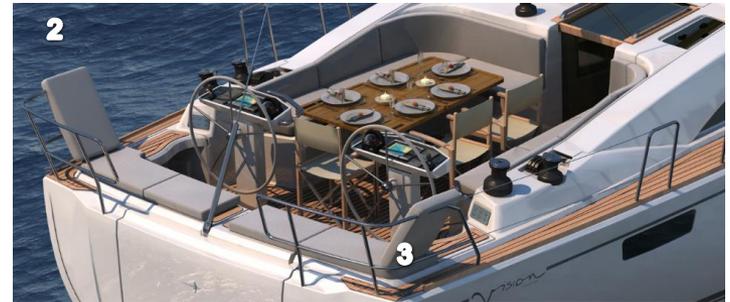

The most consequent and unique Cockpit Concept of the VISION 46 is offering exactly that!

1. Most ergonomic seating
2. Sitting behind, beside and around the wheel possible
3. All winches and major lines in easy reach when sitting
4. In last consequence all trimming while sailing by push-button – Option
5. Comfortable `social area´ around the helmsman stand for two
6. Most comfortable coaming height in perfect angle when sailing
7. Most comfortable cockpit benches for stretching legs even when sailing
8. ...

Another UNIQUE benchmark!

# LAUNCH TOUR. Cockpit. Social Area.

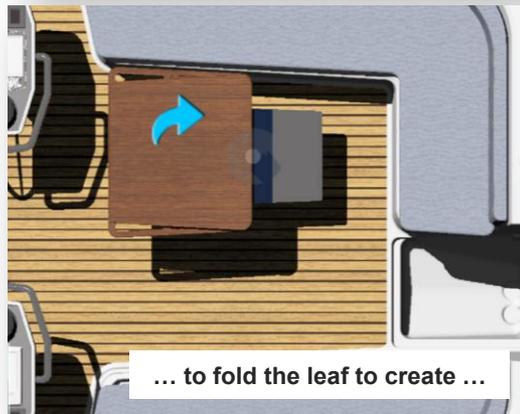

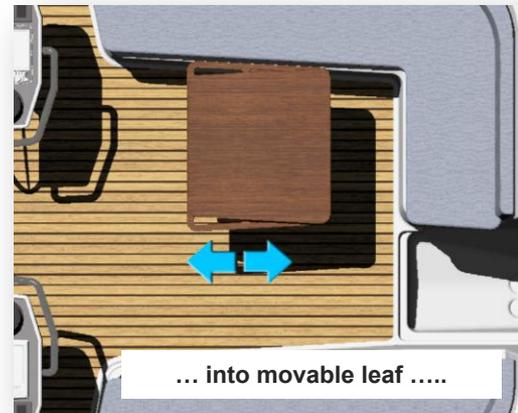

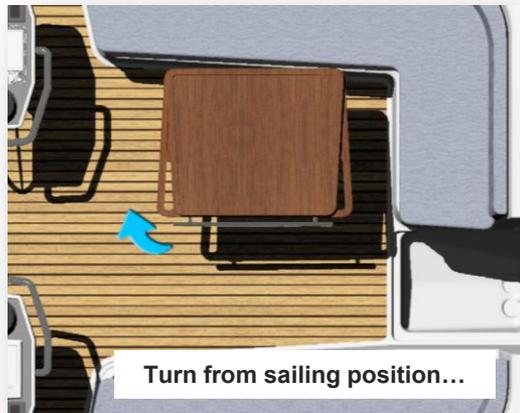

Unique for the world's market is the designated Social Area role of the cockpit concept:

- 1 Coffee table flair for a relaxed time with friends and guests sitting in the unique L-Shape bench.
- 2 Dining Table sitting 6 persons comfortably
- 3 Lounge Seats at the stern (part of the optional cockpit cushions) featuring solid backrests for maximum comfort.
- 4 Lounge & Daybed when the table is lowered – maximum comfort for sun bathing, relaxing after a hard sailing day – or just after a swim and shower on the platform. The veranda and private beach with side mounted ladder to keep the stern free for a dinghy.

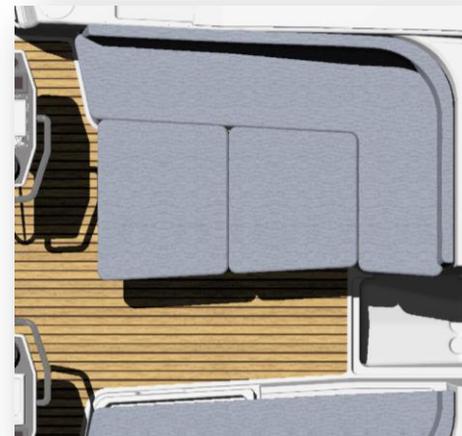

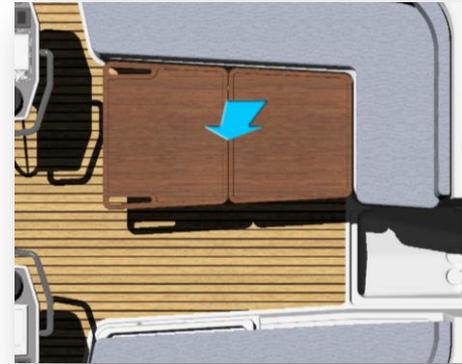

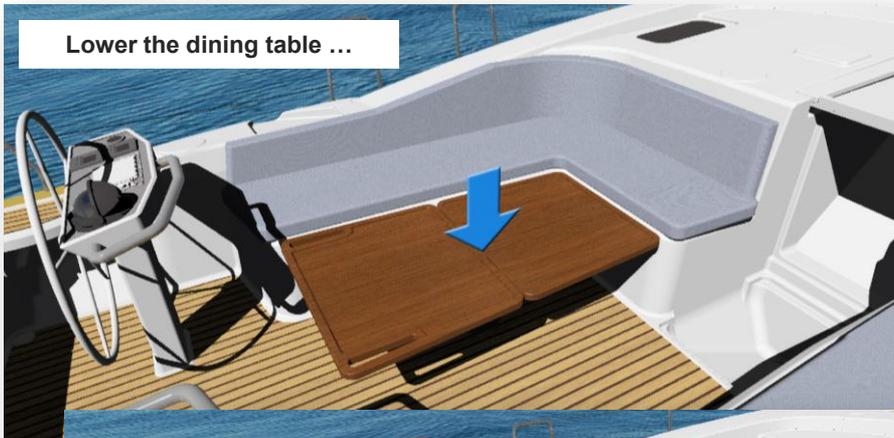

NO OTHER BOAT is offering such a luxurious comfort level!

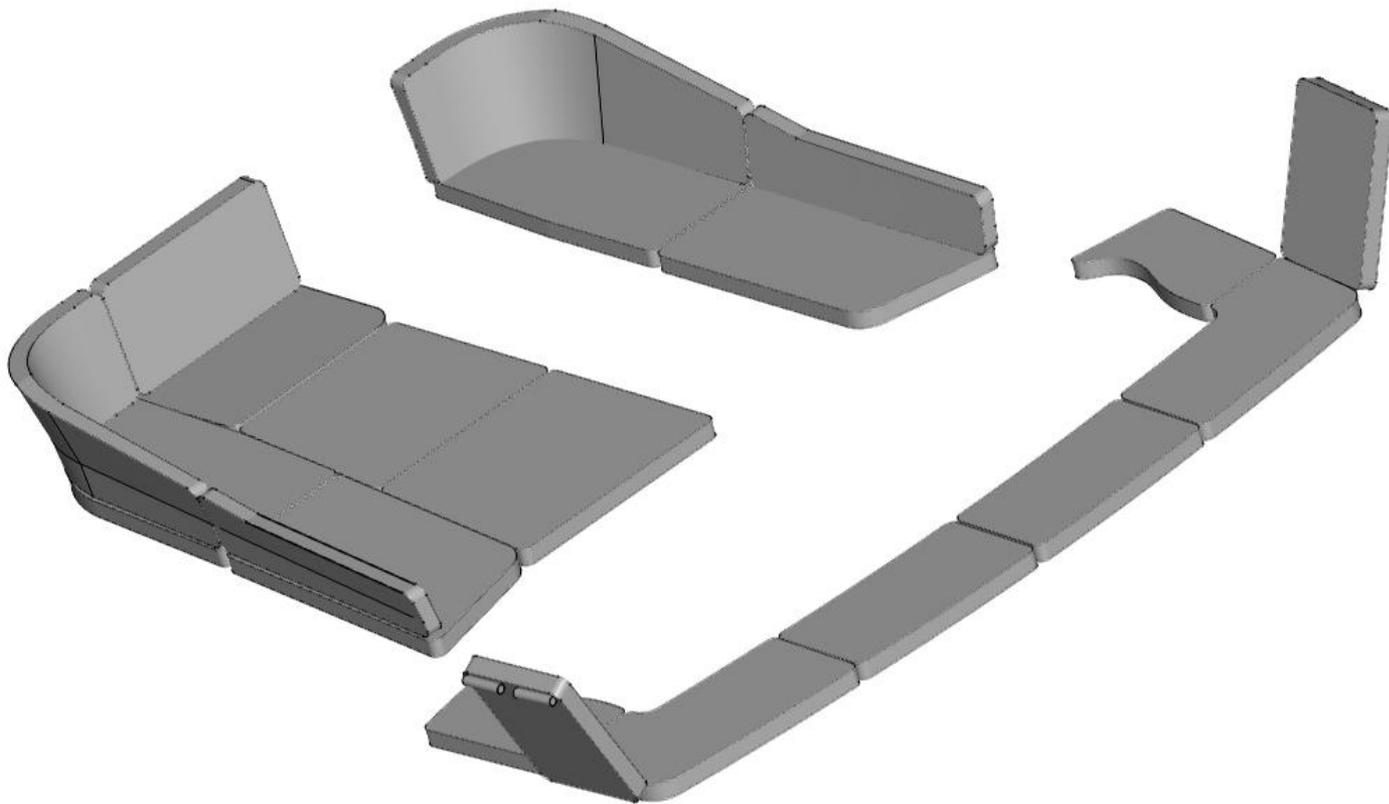

# LAUNCH TOUR. Cockpit Table – Sailing / Dining.

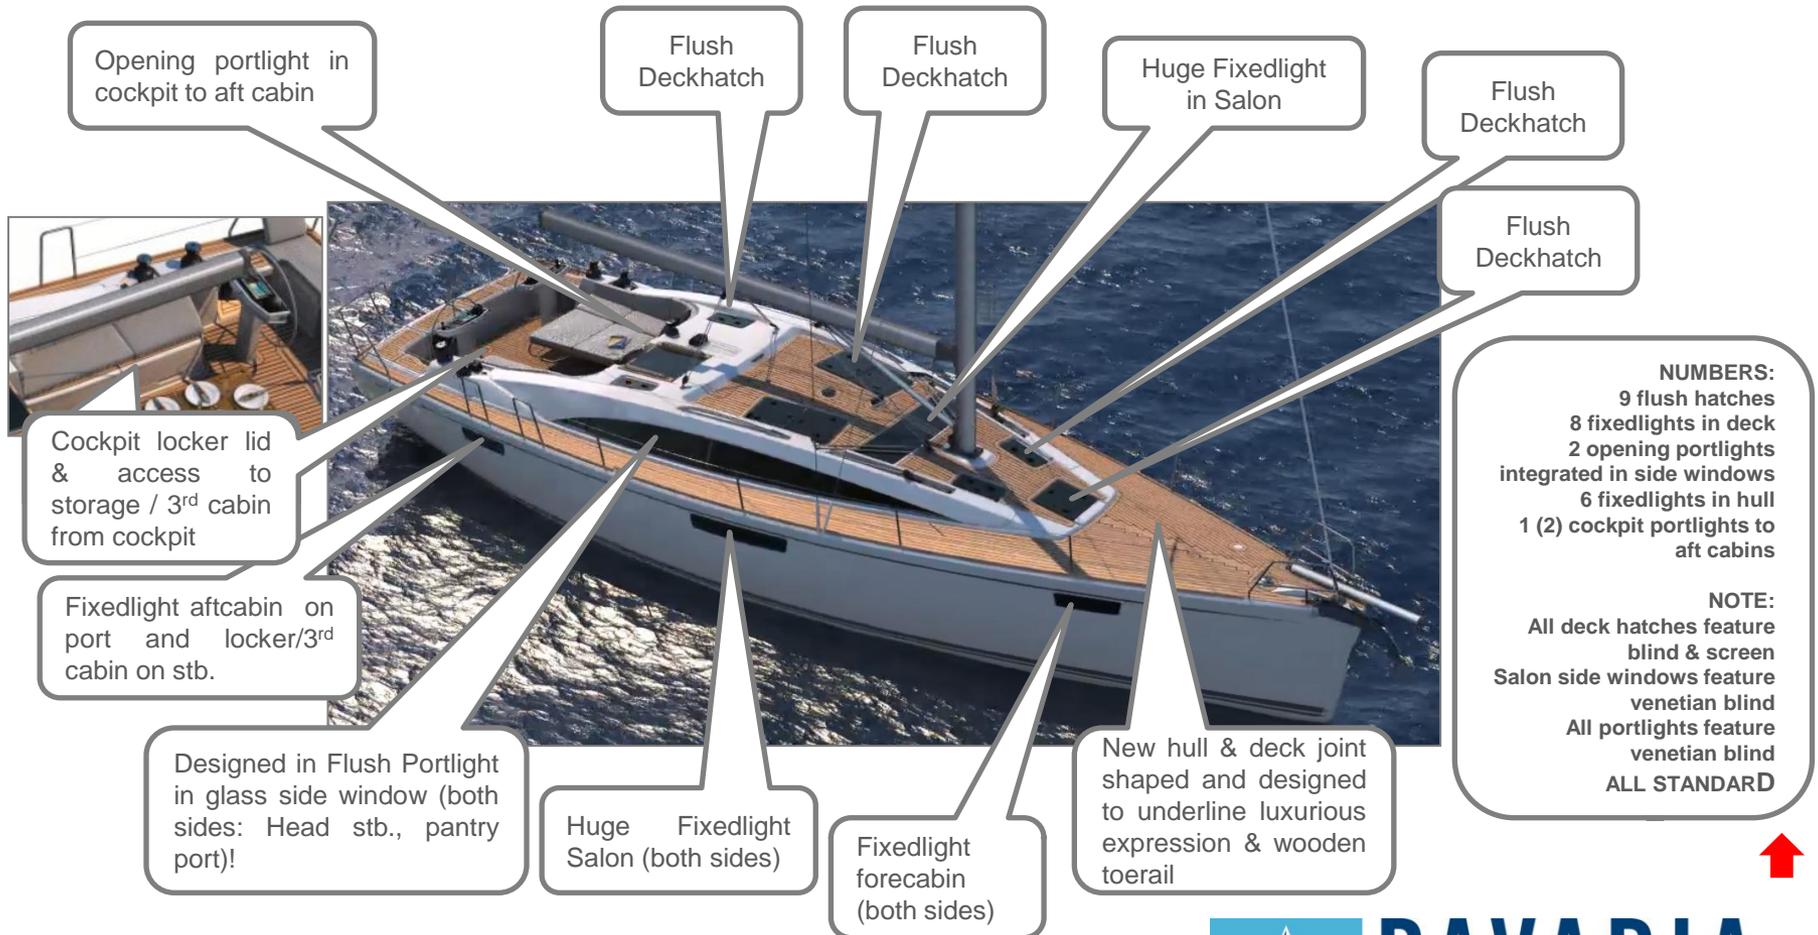

# LAUNCH TOUR. Cockpit Table – Lounging.

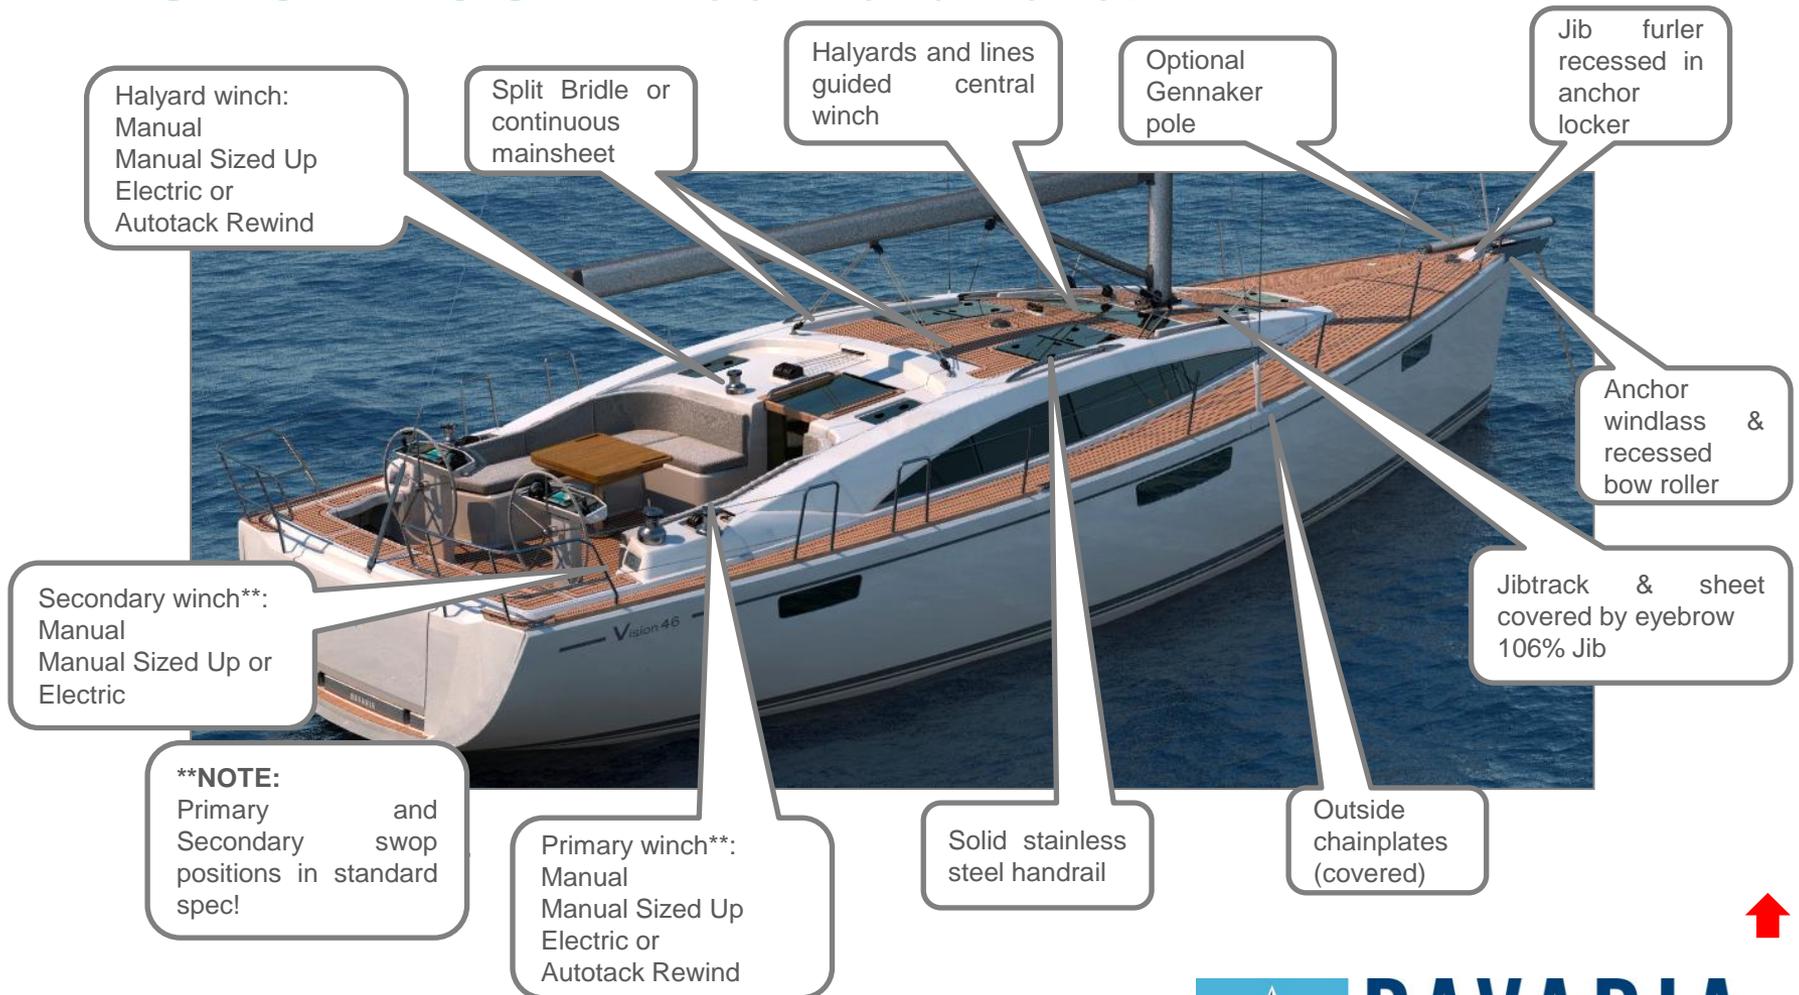

## OPTION. Cockpit Cushions.

# LAUNCH TOUR. Hatch, Portlight, Ventilation.

# LAUNCH TOUR. Deckhardware.

# LAUNCH TOUR. Foreship Cabin.

Shelf and storage at forward bulkhead featuring bookshelves, glass holder, reading lamps. Optional: iPod Docking, Fusion Multimedia

Shoe storage  
Accepts 6 pair of shoes

Seat & desk featuring storage (and mirror under desktop)

King Size island bed, top loading storage under mattress for daybed upholstery / salon table

Note: Bed frame & side panels changing colors according chosen general color of wood.

Storage underneath designated to hold main cabin & nav table upholstery.

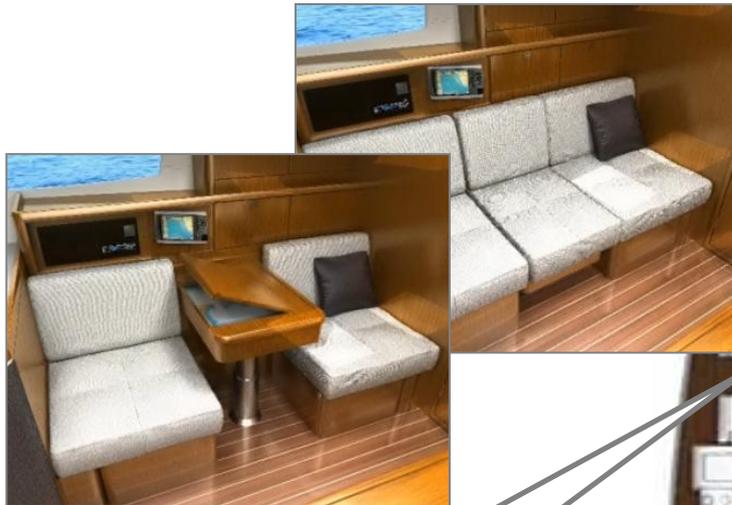

Locker and closet on both sides

Optional 2<sup>nd</sup> headroom (sink, WC, locker - replaces starboard locker closet, seat & desk)

# LAUNCH TOUR. Flexible Navstation.

Optional Rise & Fall nav table with storage allows full nav station & sofa when lowered.

**NOTE:** Nav table is moved on a mechanic integrated in the furniture – no post!

Both seats can be separately moved between nav station & settee to add seating to the table.

# LAUNCH TOUR. Flexible Settee.

Glass, dishes and  
Bottle Locker

**Note:** No fridge!

L-Settee in standard  
layout utilizing  
Navstation seats

Optional Lift & Lower  
Table (electric)  
**converts settee into  
Coffee Table**

Optional Rise & Fall Table  
(electric) **converts settee into a  
lounging area and/or additional  
double bed** – for i.e. unexpected  
overnight guests.

# LAUNCH TOUR. Pantry.

Door to aft cabin

Optional microwave oven replaces storage

Big Opening portlight integrated in side window

Top- & Front Loader icebox 80L

3 Drawers for easier top-loading access.

Storage underneath double sinks (opening from inside pantry!)

Midship double sink with central pump – automatic.

Optional coffee machine, beer tab or ice maker replaces dry-shelves for dishes  
Note: We only suggest machines – not fitting. 220V plug installed.

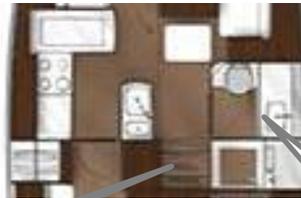

All hatches featuring blind & screen units, fixedlights shades – in standard

# LAUNCH TOUR. Heads & Companionway.

Toolbox and access to main switches engine, service and optional thruster battery!

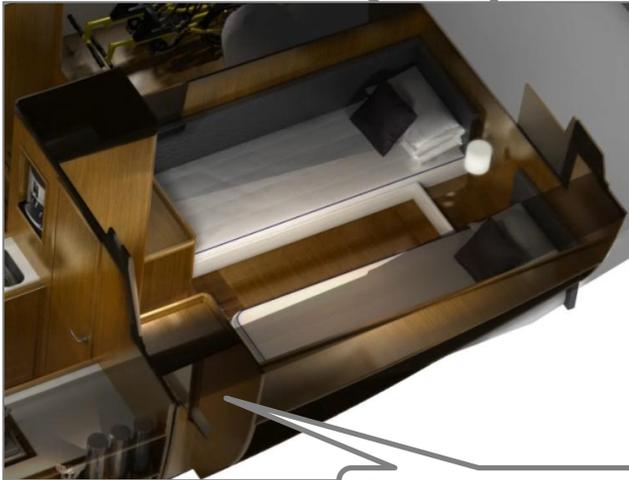

Separated and full equipped shower cell (lowered floor) – walkthrough to walk able cockpit locker / to optional 3<sup>rd</sup> cabin

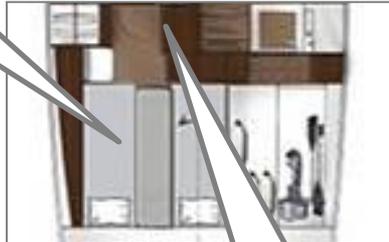

# LAUNCH TOUR. Aft Cabin Port.

2 separate berths – combinable with filler piece to a king size bed (vertically stowed to midship bulkhead)

Big closet with hangers and shelves

Inspection Hatch & access to main engine.

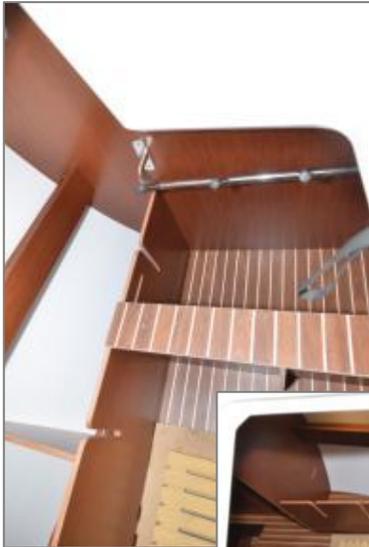

Book shelf and lockers

Seat

# LAUNCH TOUR. Cockpit Locker & opt. 3rd cab.

Cockpit Locker  
Adjustable storage splitter, step in/out of locker, stainless steel rope/line hanger astern.  
Inside trigger for lid latch

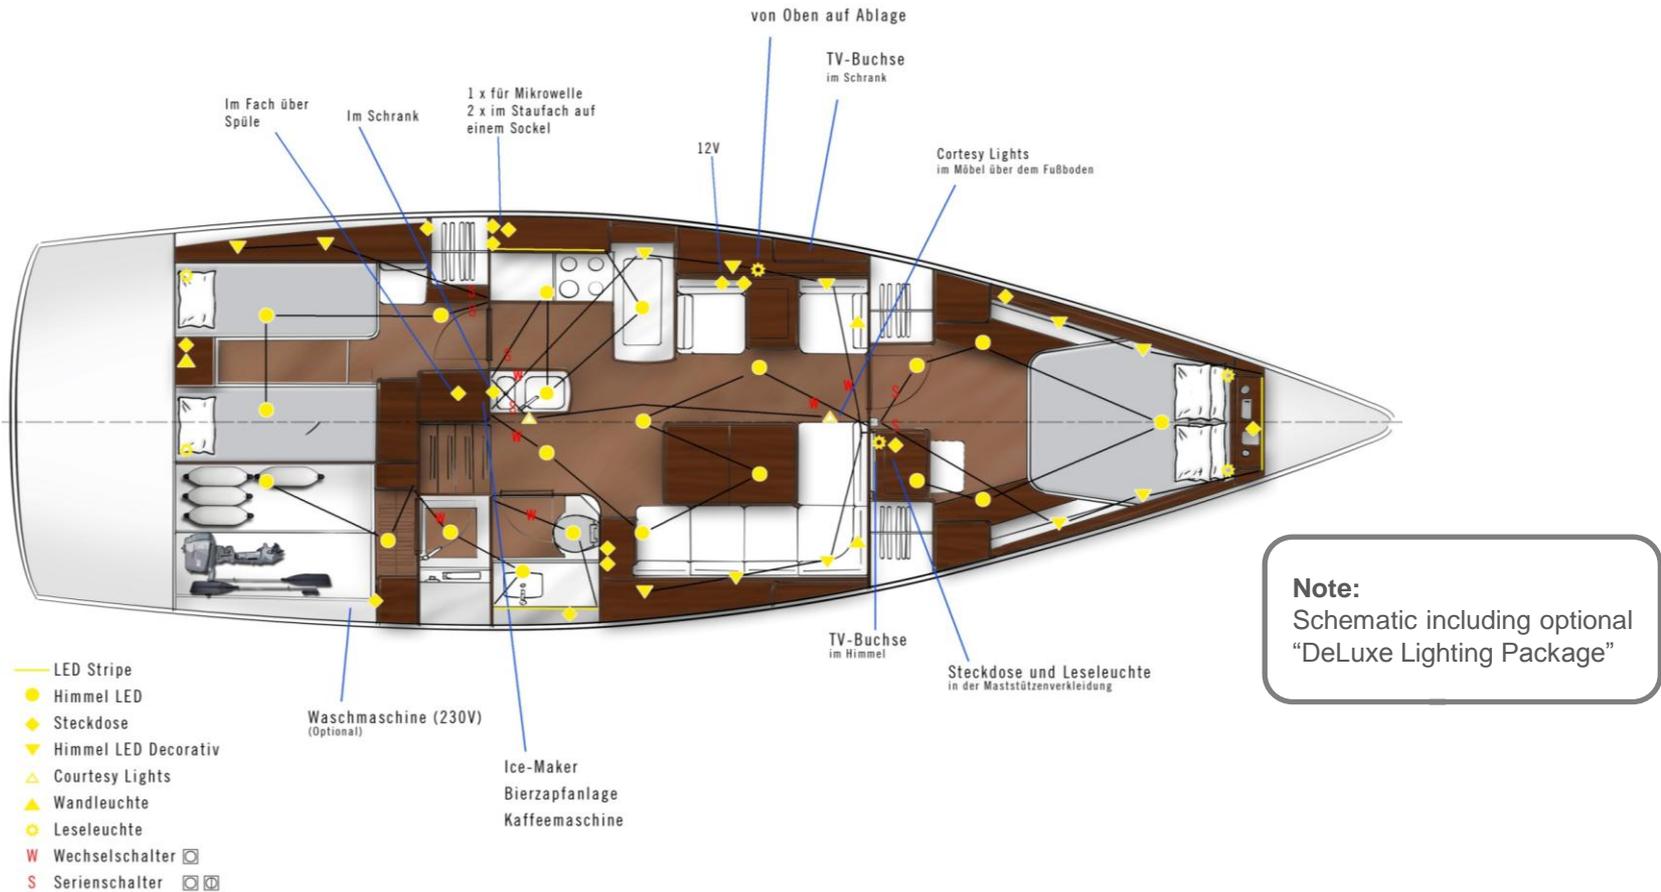

OPTIONAL  
3<sup>rd</sup> Cabin replaces cockpit locker!

Access via cockpit locker lid or through the head & shower cell on starboard.

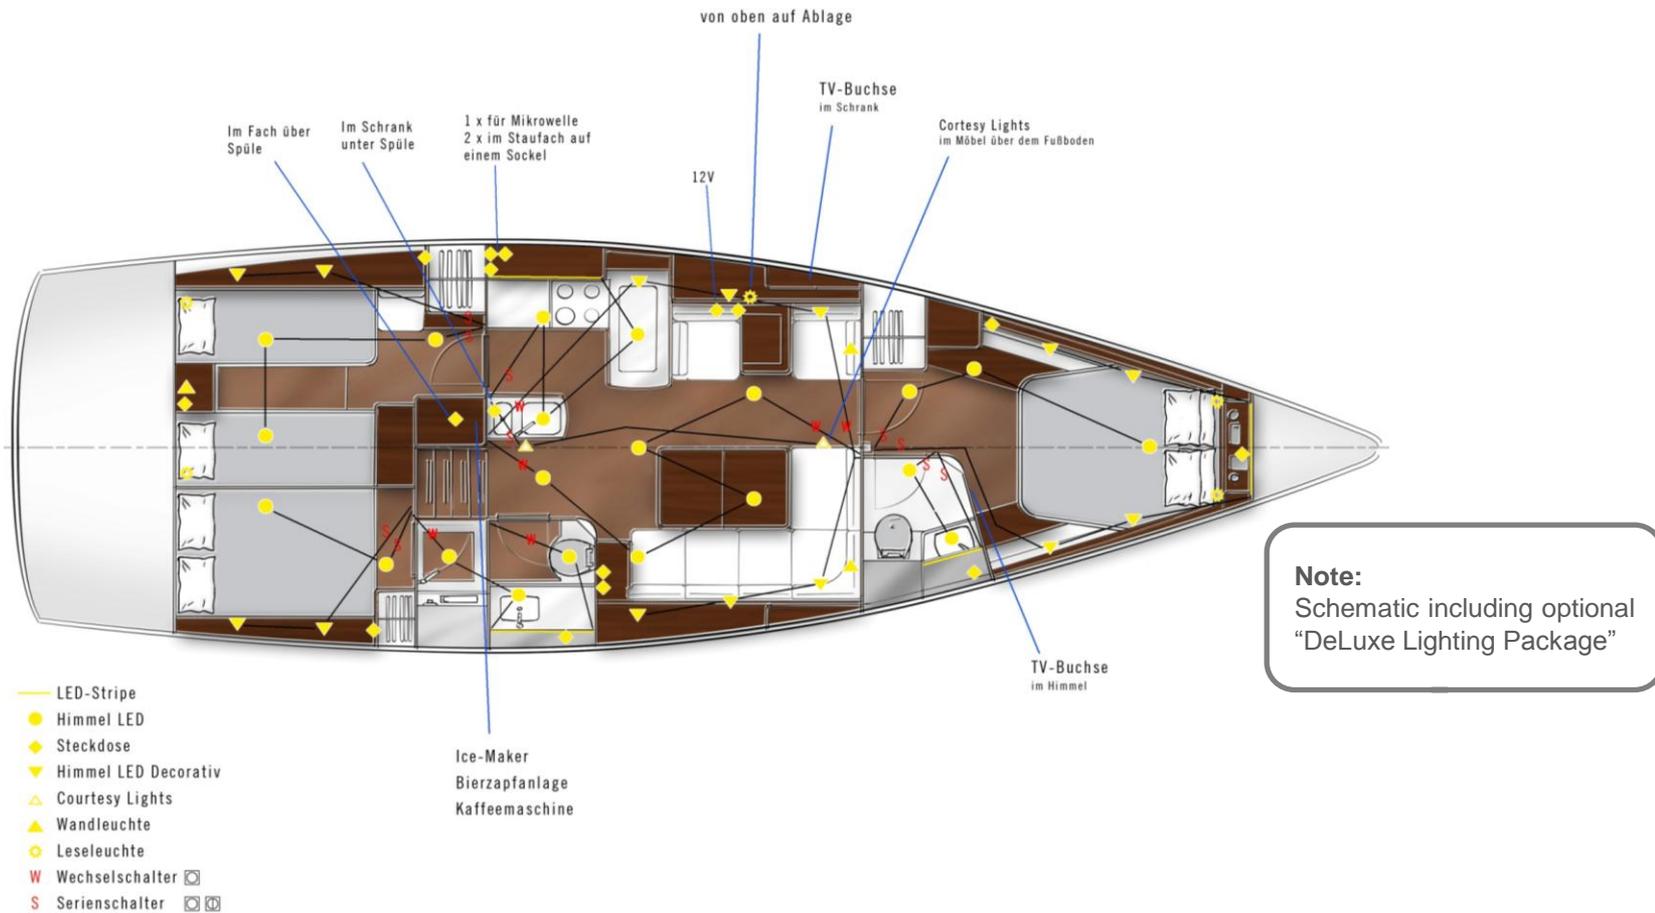

Full Double Bed, closet, lockers & shelves

## SYSTEM. Freshwater Tanks.

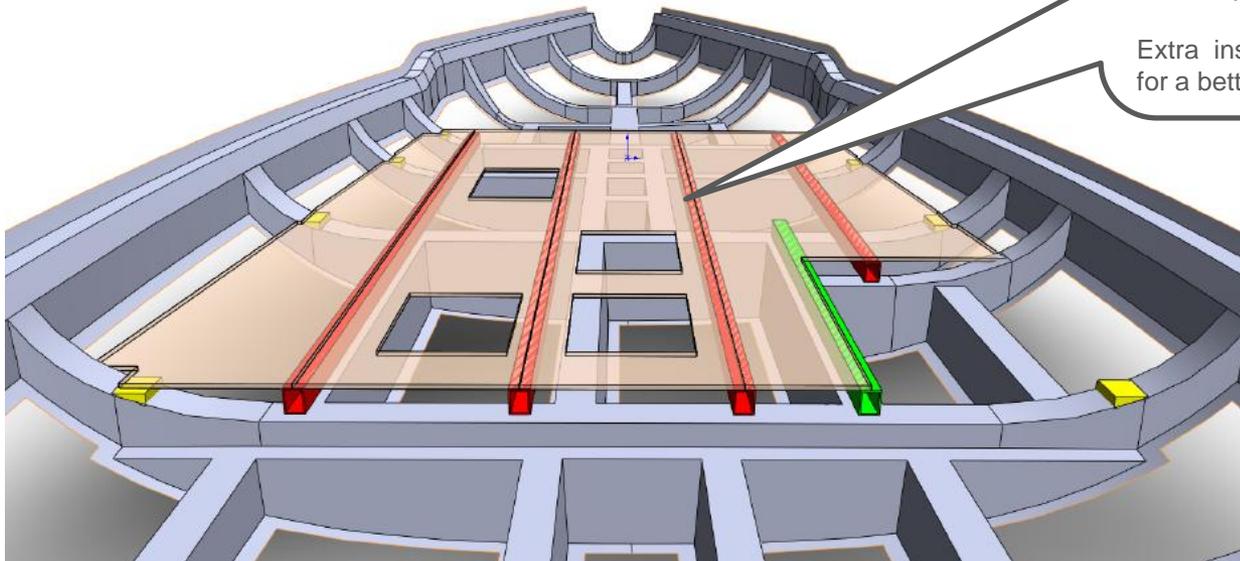

# SYSTEM. Floor Panels.

Floor panels in main cabin mounted on a sub frame for higher accuracy of floor level.

Perfectly leveling the standing height to window position.

Extra inspection hatches are integrated for a better access to hull liner / bilge.

# OPTION. Floor Panel Colors.

Interior Color	<p>Sipo</p> 	<p>Teak</p> 	<p>Eiche</p> 
Standard Floor	 <p>Kastanie</p>	 <p>Walnuss natur</p>	 <p>Walnuss natur</p>
Optional Floor	 <p>OceanLine braun</p>	 <p>OceanLine braun</p>	 <p>OceanLine braun</p>

# SYSTEM. Steering.

## Steering System:

### Twin Wheel Single Rudder Open Wire Steering

Following the principle of one continuous 7x19 stainless steel cable starting and ending at the radial quadrant on the rudder stock.

Emergency tiller is applied through the lid covered access from the cockpit floor.  
Emergency tiller is stowed in the aft storage kept at the bulkhead.

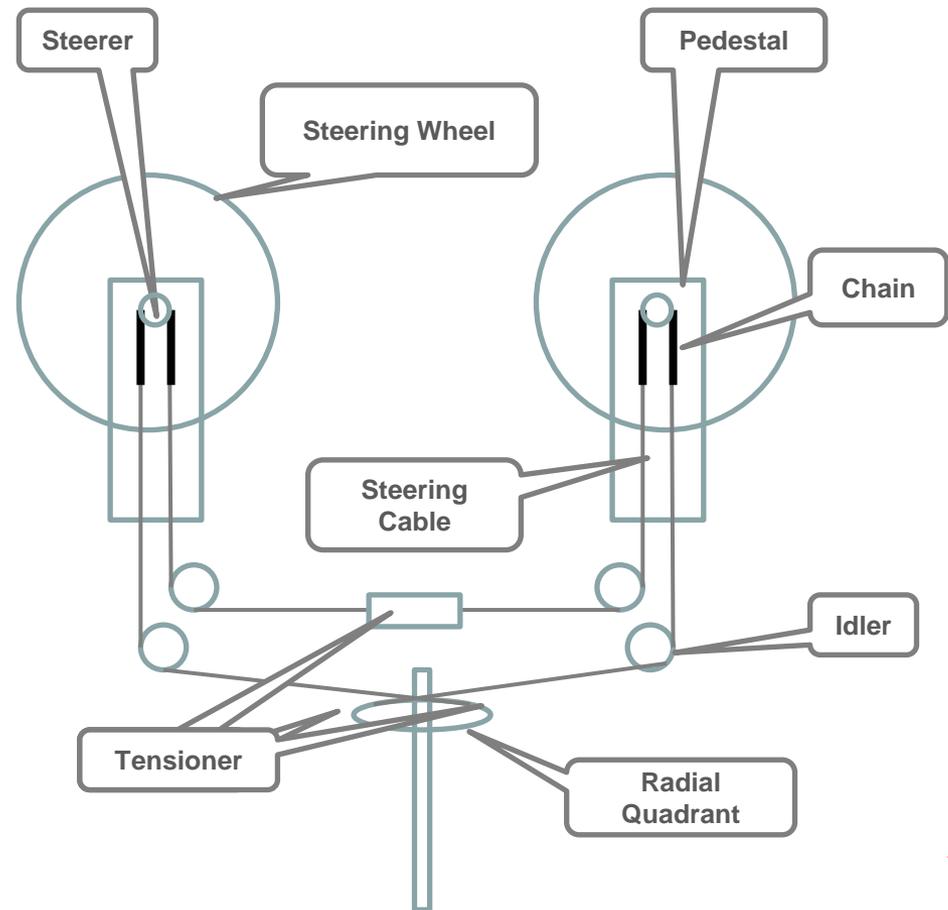

### Rudder Bearings:

The bearings of the rudder stock are self aligning, roller bearing type units. is

### Autopilot Drive (optional):

Rotary Sprocket Drive fitted to the port side idler bracket running on a separate continuous chain loop to the port side steerer.

All parts Lewmar.

# STRUCTURE. General Information.

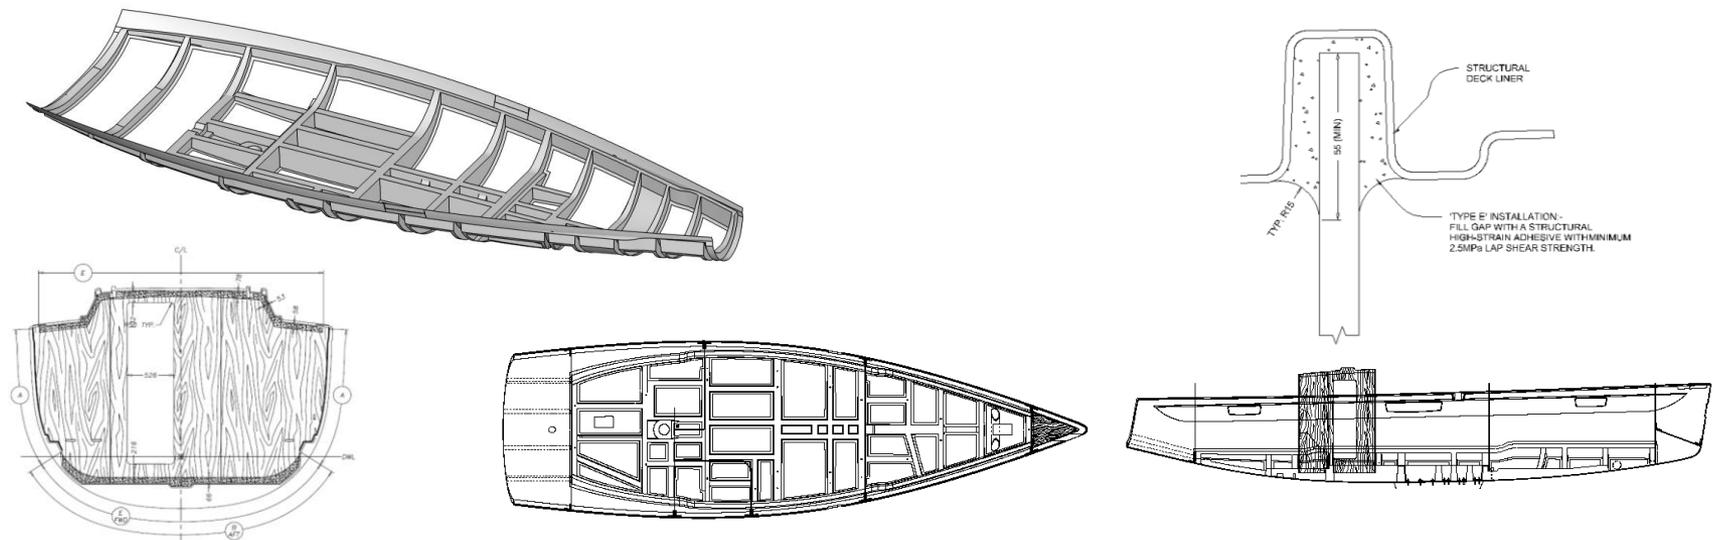

Following the Farr Engineering and highest stability standards and exceeding the CE requirements dramatically (applies also for all Bavaria Yachts) – with special care taken to grounding situations – resulting in the most solid structure of a production yacht on the market. Another benchmark Bavaria is setting!

The Deck, Deck Liner, Hull and Hull Liner do feature a new and special way of integrating structure and stability into the laminates and it´s engineering.

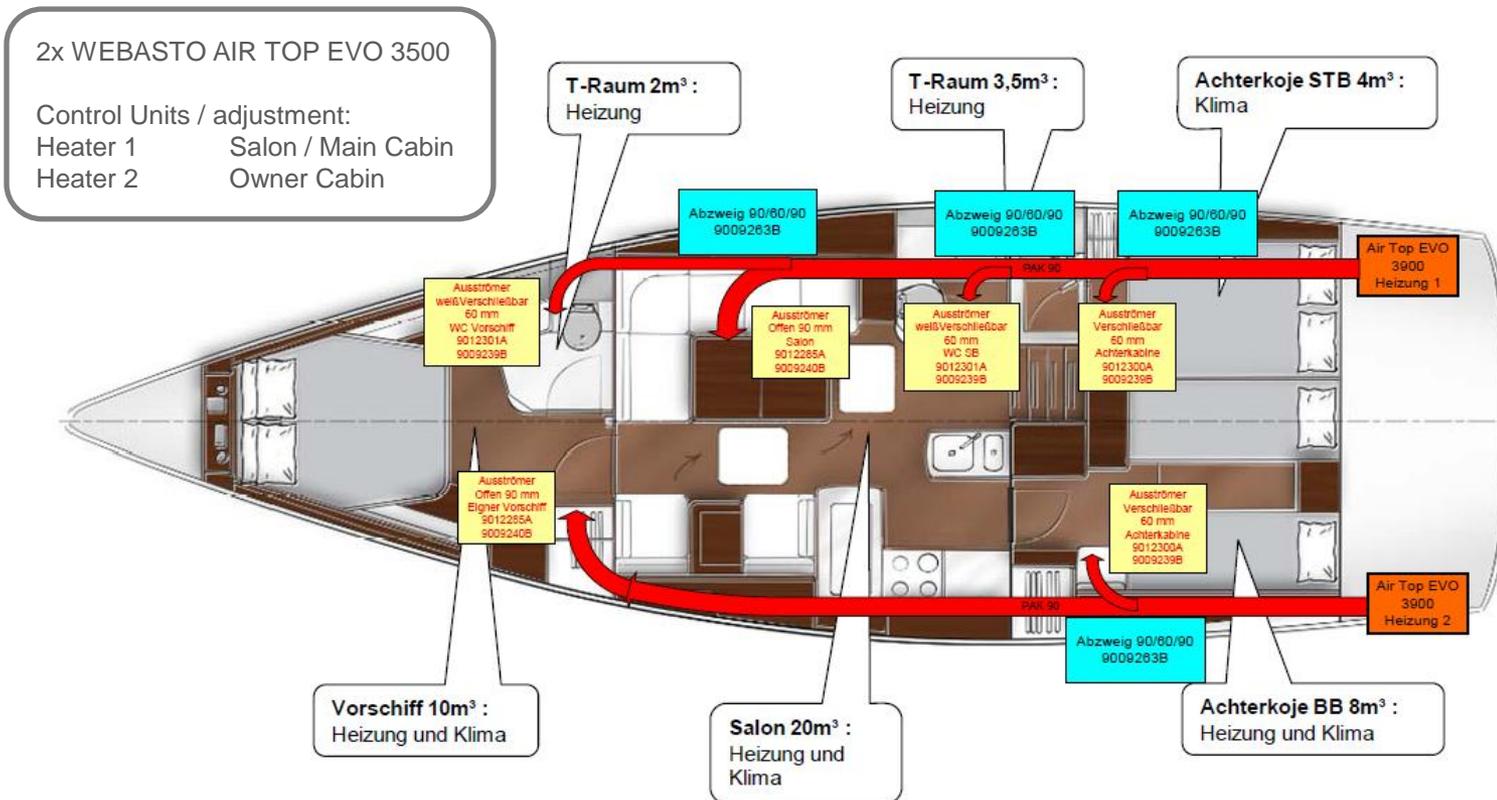

Due to this the structural bulkheads are more efficient in transmitting loading and eventual shock loadings into the superstructure of the yacht – which is another unique way of a Farr Yacht Design engineered yacht.

Several new materials and ways of production – such like split moulding for the hull allowing the shaped and designed sheer line – do allow Bavaria to create not only a new design or the bonded structure, which is surveyed from the Germanischer Lloyd and certified.

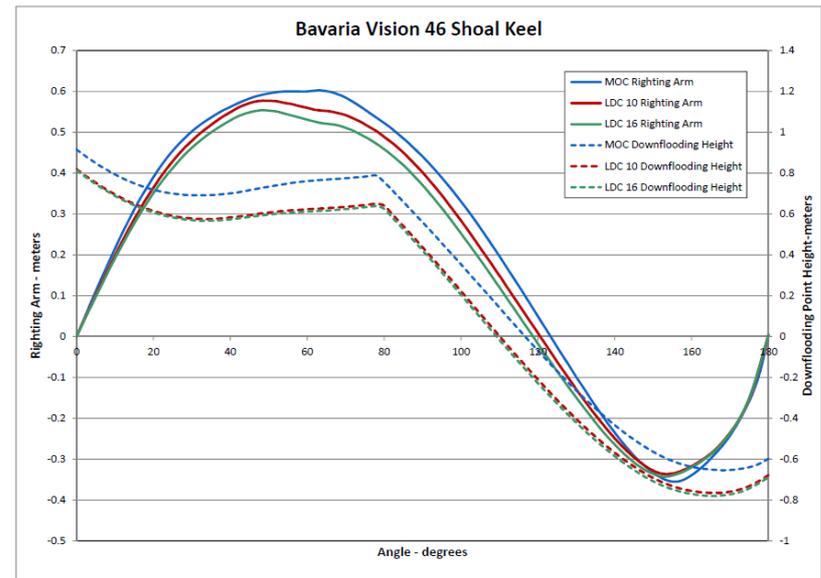

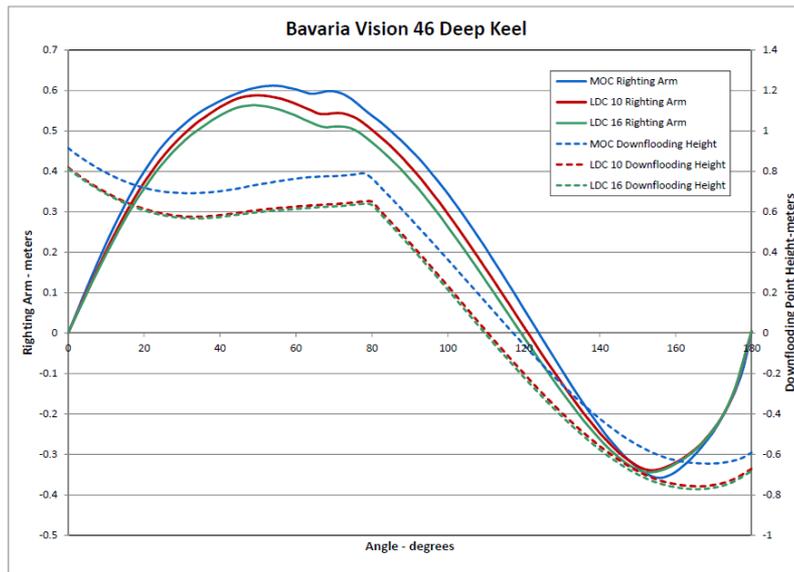

The New Vision is the start of a new production way in the yard allowing more flexibility in respect of design.

## INFO. Quality Management.

Beside the internal Construction Department, manned by 12 qualified Design Engineers working with the latest 3D Technology, the internal Interior Design Department and the Development Department, Bavaria has installed a complex and fully integrated Quality Control Management.

This department is involved in every production process and step as so is running the final quality check running from the 5<sup>th</sup> last production station up to the final commissioning of a new yacht prior to leave the halls.

The file of documentation of the production from each boat is impressive and contains all the information about each step from a roll of glass fiber up to the polished and shiny proud yacht. This allows us to reproduce the growth of each and individual yacht.

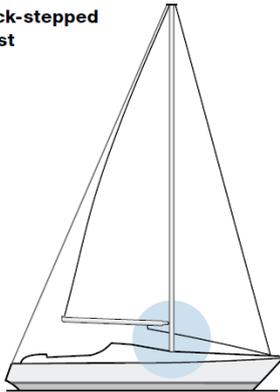

And, as mentioned before, we are proud of this additional hurdle for a production process but enabling us to get our yachts up to a quality level, where the designs and constructions need to be!

The Germanischer Lloyd is randomly checking the execution of the documented product specifications.

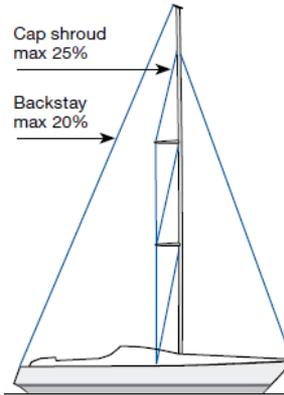

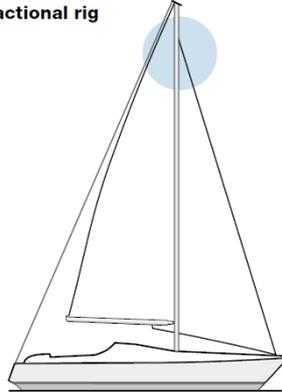

# RIG. Characteristics.

**Deck-stepped mast**

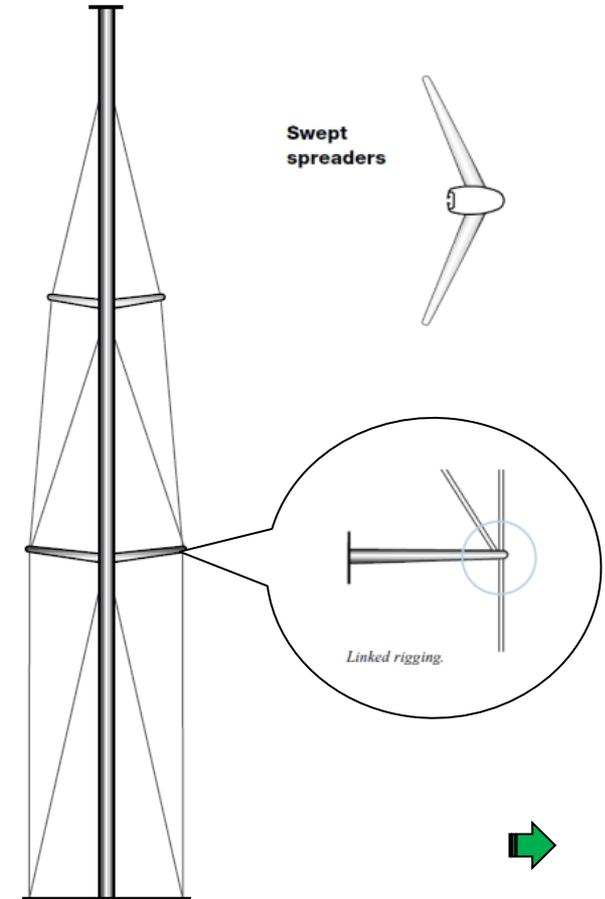

**Fractional rig**

**RIGG features (both Conventional & Furling):**

- 9/10 Rigging
- Deck stepped
- Swept Spreaders
- Discontinuous ("linked") Rigging
- 2 Spreader pairs
- 400 Series Furlex headstay furler in Standard – recessed in anchor locker

# RIG. Trim.

Due to the design of the rig featuring swept back spreaders & 9/10<sup>th</sup> rigging, it is absolute important and necessary to adjust and tune the rig as it has to be.  
With every boat & rig a manual is supplied showing the correct and right way of the perfect tuning of the entire rig. Please always refer to the Seldén Manual to trim and rig the mast correct.

Here we just want to point out, that the stays DO NEED to get tensioned right to achieve the best possible and most safe (!) rigging on our yachts.

You might be scared by the suggested load to apply, but don't worry! Trim the rig as described and you will feel the difference on sea!

And don't even think about the yacht being not stiff enough to take it!

The All New Cruiser Line is designed to take such loads easily – plus a seriously sound safety margin

**IMPORTANT: The correct tensioning is just a fraction of important facts and safety issues to take care for!**

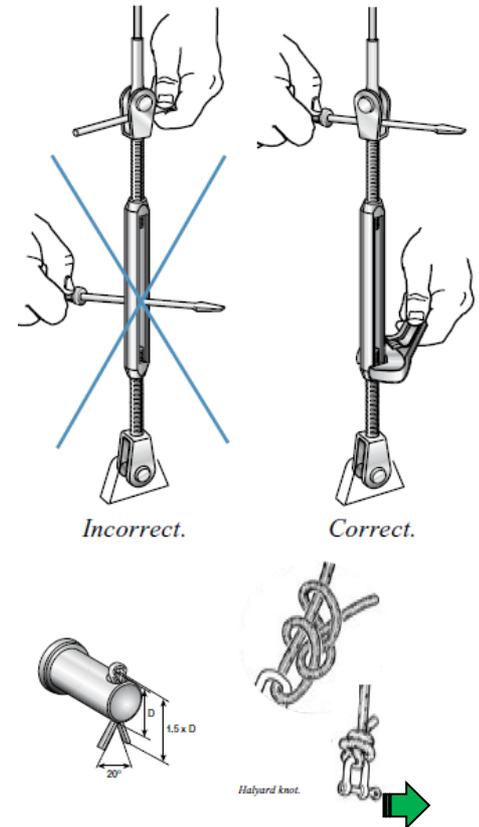

For full rigging instructions please refer to the supplied manufacturers manual.

On the following page we purely focus on loadings of stays & rig – as it is vital to understand this point to achieve the best sailing performance of the new Cruiser Range Yachts by Bavaria!

Prior to talk about the characteristic of tensioning our rigs, please note the sketch right showing the right way how to turn the rigging screw bodies!

A common mistake which can result in dramatic errors is shown as "incorrect"!

By disregarding this, a failure or damage to the rigging screw will be the result! The friction on the thread of the screws is huge. So the use of the supplied grease/oil and correct tools is important!

# RIG. Folding Rule Method.

## “The folding rule method”

Seldén has developed a very simple but efficient way of measuring the correct load applied to a stay.

The correct load applied to V1 & D1 (upper and lower shrouds) should be within 15-20% of the breaking load of the wire rope.

It is in the nature of stainless wire ropes (we use 1x19 construction for stays) that it stretches. And it is designed to do so!

For a 1x19 wire it is given that 5% of the breaking load results in a 1mm stretch over a distance of 200cm.

Regardless the wire diameter!

To achieve the min. 15% of the breaking load, the stay has to get stretched by 3mm measured over a 200cm length of the stay. As sketched right.

In respect to the new Cruiser Range we suggest 20% to stiffen the rig and headstay.

The maximum of 20% is resulting in 4mm stretch over 2m distance – which is relevant for our yachts.

This load application can simply get measured by the use of a Folding Measure taped to the shroud as shown on the sketch right.

1. Rig unloaded from upper end of swage terminal on the stay upright.
2. Tape and secure the measure at the top end.
3. Tension the stay as described above to the load required (4mm stretch over 200cm distance).

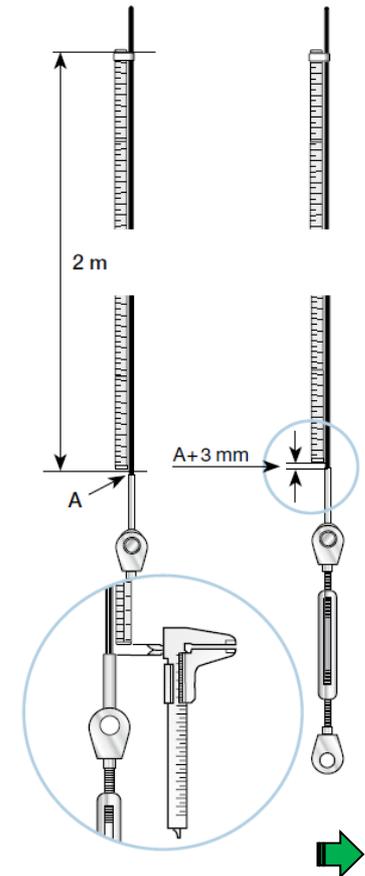

Depending on several facts it might be the case to fine-tune the mast while sailing by turning the slightly deloaded leeward shroud.

This is a fact to take care for while rigging the boat as usual – tuning the shrouds in the correct way.

Talking about facts: The little sketch is showing the correct way of using the turnbuckles! Please make sure you do turn the body of the rigging screw the right way – as sketched up!

If you follow this rule, the boat WILL sail very different! You will feel it on the helm while going upwind.

... not to forget the optional hydraulic backstay which allows a quick, easy and pretty efficient trim of the mainsail!

## “High Tech” or “Exclusive Sails”

This cloth quality used is an upgrade from the normal and standard used Dacron material.

The main characteristic of this laminate cloth (Dymension Polyant “DCP”) is that several layers of different materials are laminated together to create the loadable cloth from where the radial cut sails are laid out, cut and sewn.

Compared to Dacron this cloth is strong, stable and keeps the shape of the sail for a much longer time than a Dacron® sail.

The New Cruiser sails do feature a grey UV-guard applied to the aft leech of the furling jib – also featuring vertical battens on the aft leech, upgrading this sail to a High Aspect Jib.

The furling mainsail does have a UV-guard applied on the clew to cover it from UV radiation when stowed in the mast / furled in.

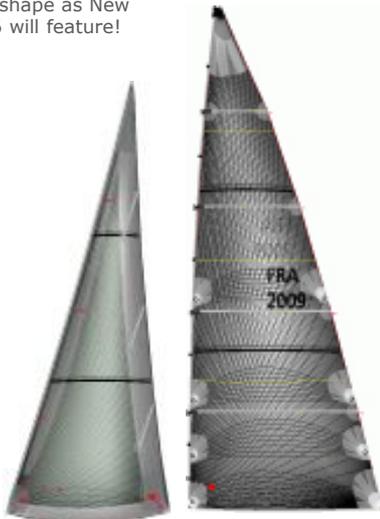

Conventional sails do not feature an additional UV-guard! By the use of the boom cover, the sails are safe from UV when stowed on the boom.

# SAILS. EPEX® Membrane.

Photo shows Cruiser 45 Design & shape as New Vision 46 will feature!

## EPEX Technology

By talking about evolution in boat building and designs, Bavaria also offers a third quality level of sails – the upper end. EPEX.

EPEX is a patented manufacturing process from Elvström Sails offering the state-of-the-art MEMBRANE SAIL construction.

The basic idea is coming from the Grand Prix sailing circus. But as the characteristics of this quality is such a big step forward from the compared heavier Laminate cloth, that the principle is adopted to the Cruising market to offer the most durable sails, best and durable shape, best possible UV-resistance by keeping the sails as light as possible.

You might think `yee, we don't need a racing sail´ which also might be your point.

BUT by using this new technology, you will be able to even more improve the sailing ability of our and so your Bavaria Yacht! Production technologies are evolutionary as never before.

YES, the investment in such sails is higher than the Exclusive Sails we do offer.

BUT the lifetime is basically 3x+ higher compared to the DC Laminate cloth used for the Exclusive sails. And you get a 3 years warranty from Elvström Sails on the construction of this unique sail quality.

One out of so many pro's: The integrated UV-guard all over the sail – so called Tafetta (outside skins) and special equipment of the bonding material is blocking UV from damaging the cloth construction. Coming back to lifetime and durability! Unbeatable durability. And this is paying back the investment where you also improve your boat's ability quite a bit.

You are selling/buying one out of the best Bavaria Yacht ranges ever built.

Why not considering to use the best sails to power the yachts plus adopting the state-of-the-art appearance of the sailplan?

# SAILS. Gennaker.

Photo shows Cruiser 45 Design & shape as New Vision 46 will feature!

**Snuffer Hose**  
For easy sail handling and downwind fun with safe speed by using such a kite!

The optional Gennaker is designed and laid out as a Downwind Gennaker. Designed for courses from 85° down to 170° AWA.

Reason for that is that this design of a Gennaker is able to fully complete the cruising wardrobe of sails to cover ANY course by delivering the best sailing performance - but with most possible less sail handling close to hassle free.

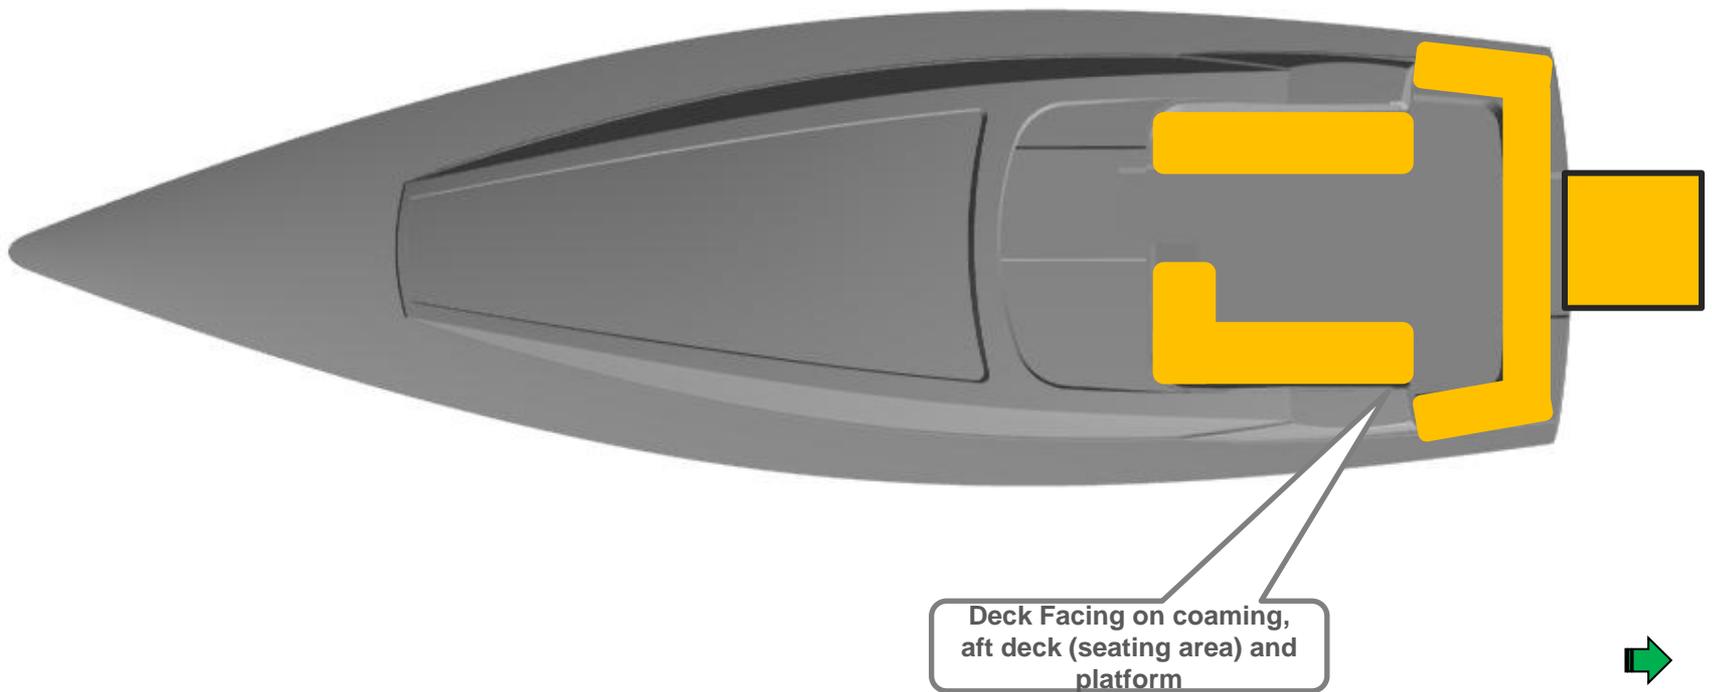

There are other sail designs on the market, but this particular shape is chosen for the best accomplishment of the concept of the new Cruiser Yachts by Bavaria Yachts.

The Gennaker Kit includes the sail, snuffer hose, halyard, all blocks required, the Gennaker pole with fittings & a sheet set.

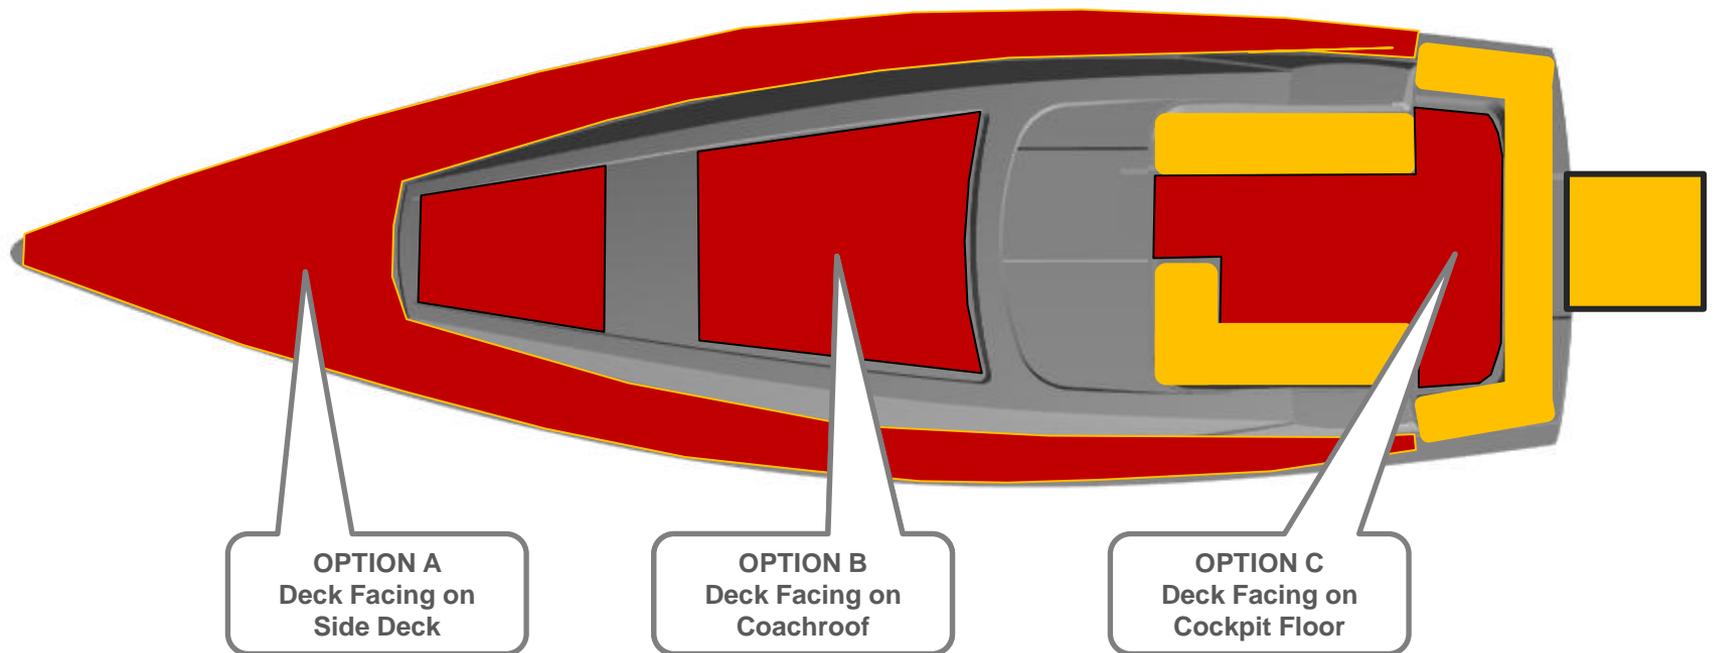

Make more fun out of the boat and use a Gennaker!

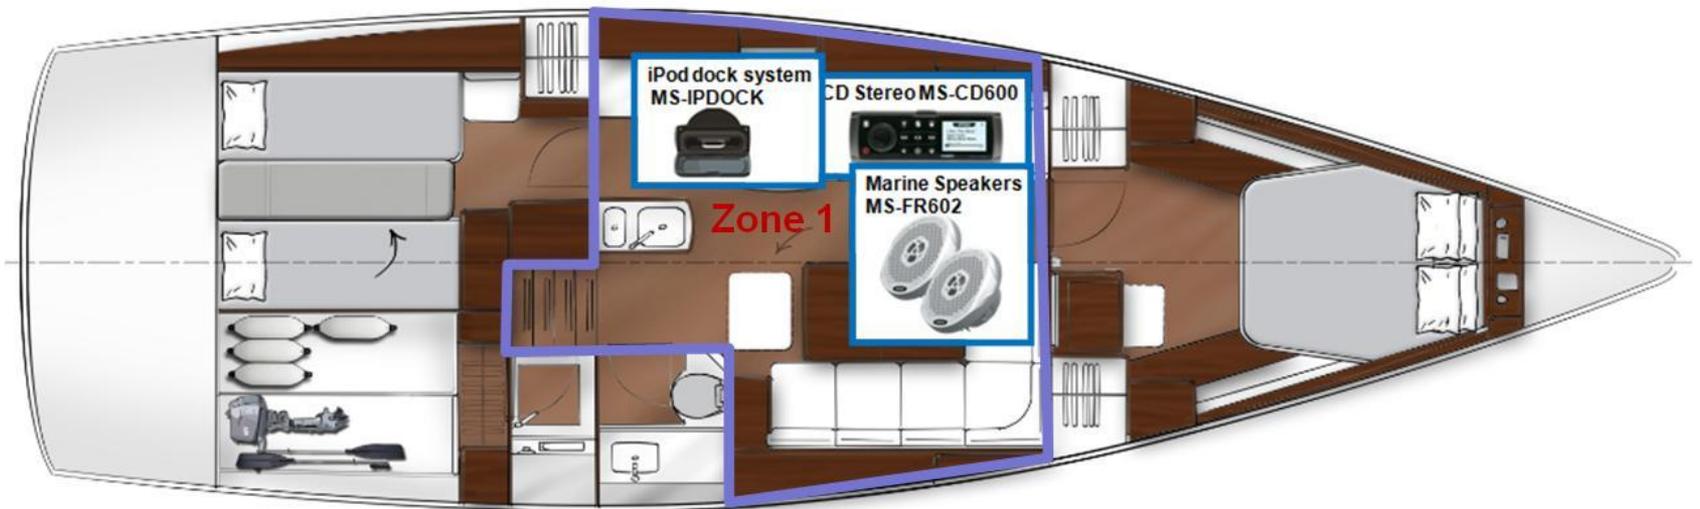

## DECK. Standard Facing.

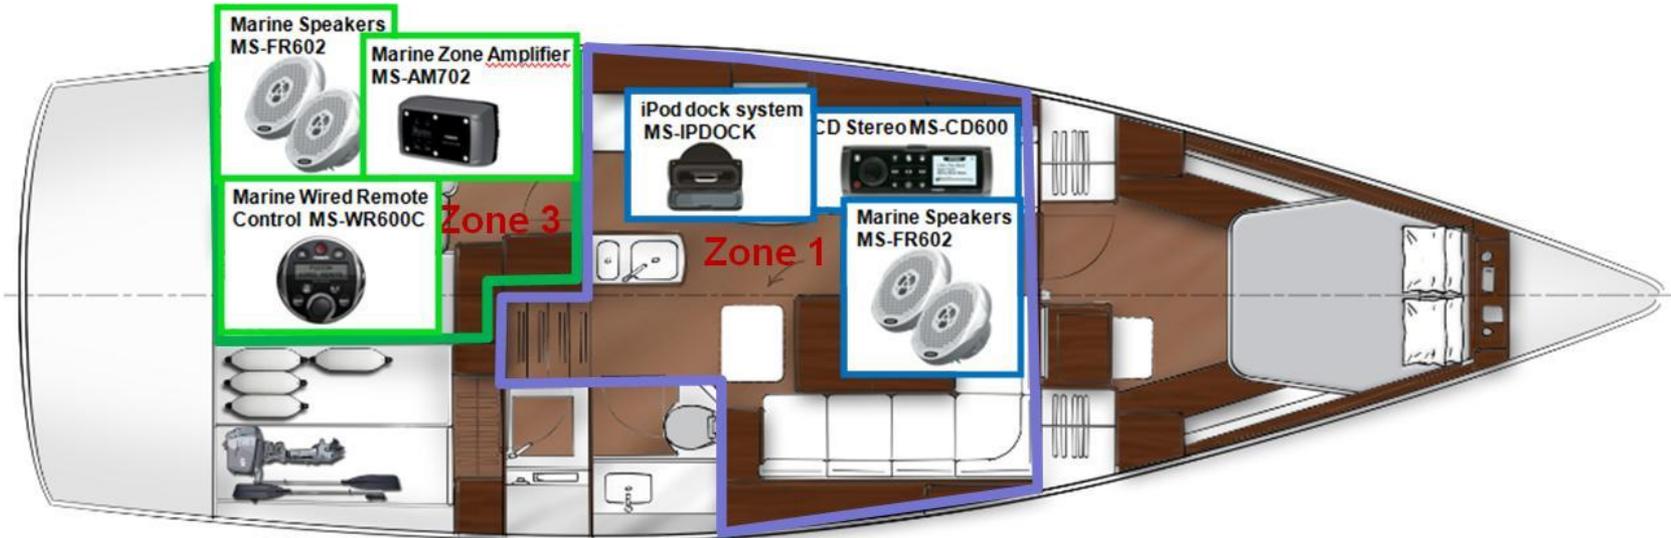

# DECK. Optional Facing.

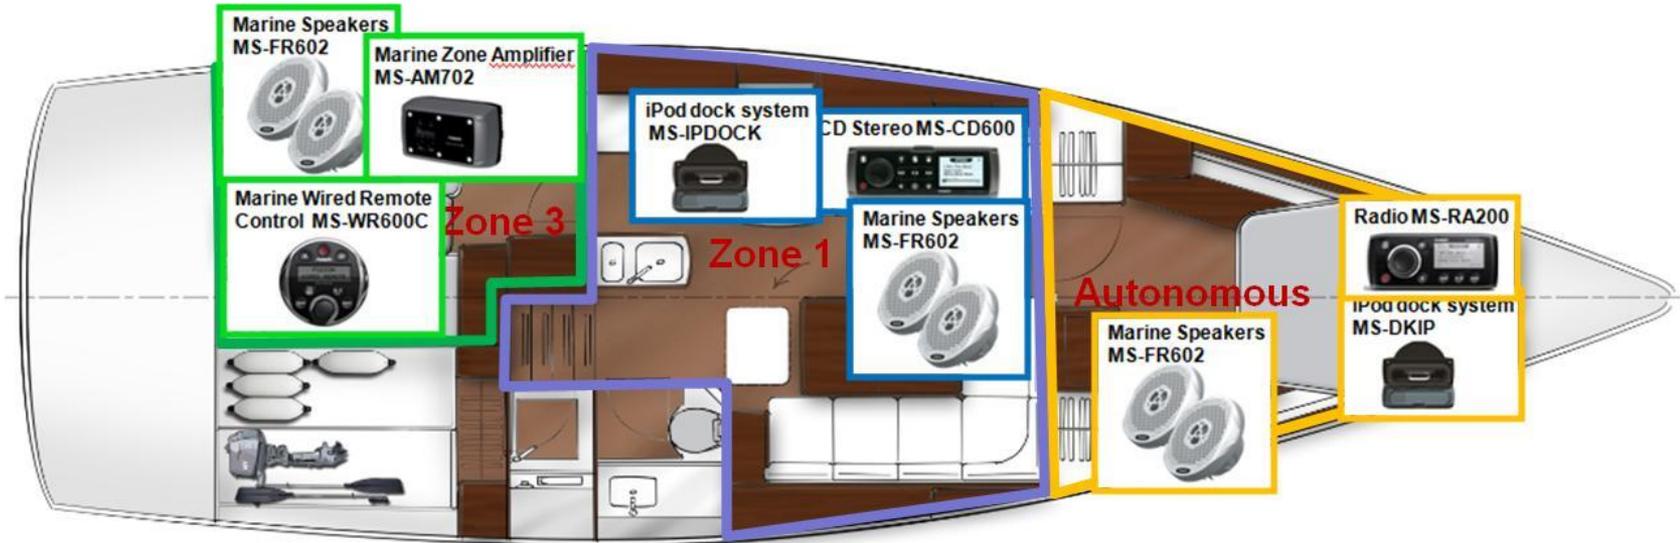

# FUSION. MM Basic Package.

# FUSION. MM Remote & Owner Cabin.

# FUSION. MM Remote & Owner Cabin + 2x TV.

# FUSION. Stereo & Speaker.

## CD Stereo MS-CD600

CD / CD-R / CD-RW, MP3 Playback / 360 degree Waterproof  
 3 Zones of Audio /AM/FM, Sirius Satellite Radio  
 iPod Compatible /Aux Input /70 x 4 channels  
 Class D amplifier for lower power consumption  
 2.7" (240x160 pixel) LCD with adjustable backlight for night vision  
 Wired Remote available  
 Ships with Sun/Dust Cover

## Radio MS-RA200

Shallow-Mount Stereo  
 IPx5 rated when flush mounted  
 45 x 4 channel amp.  
 AM/FM/VHF and Sirius radio.  
 Will play music off a USB flash drive  
 iPod Ready  
 Video from iPod when used with new dock  
 Aux Input  
 64x128 LCD with amber backlight

## Marine Speakers MS-FR602

Max Power (Watts):200  
 Efficiency (1W/1M):90dB  
 Frequency Response:70-22 kHz  
 Mounting Depth:75mm (inc. clearance)  
 Impedance:4 ohms  
 Extras:3 grills included

# FUSION. Remote & iPod Docks.

## Marine Wired Remote Control MS-WR600C

Extends the capabilities of the stereo unit by enabling local control of the audio in each zone of your vessel.

Up to four remotes can be linked to the Stereo Unit, via a CAN BUS network, providing true system flexibility.

Featuring a rotary encoder and large rubber buttons, the Wired Remote Control is very easy to navigate and control, even on a moving boat.

## iPod dock system MS-IPDOCK

iPod Dock connects directly to MS-CD or AV600, offering full control and integration of your iPod through the stereo unit.

Easy connection and mount system designed for instrument panel or exterior installation.

When flush mounted, the front of unit complies with IP65 rating, protecting iPod from the harsh marine environment.

Ships with all sleeves for iPods including iPhone.

## iPod dock system MS-DKIP

Connect FUSION's MS-DKIP Marine Dock for iPod to your MS-RA200 Marine Stereo to provide the additional benefit of an integrated housing for your iPod.

The dock connects directly to your MS-RA200 Marine Stereo, allowing full control and integration of your iPod through the Stereo. When bulkhead mounted the dock complies with IPX5 Waterproof Standards on the front of your unit, protecting your

# FUSION. Amplifier & LED TV.

## Marine Zone Amplifier MS-AM702

The Zone Amplifier is small, enabling discrete installation and when combined with the Marine Stereo Unit provides the platform for a True multi-zone audio system.

2 Channel

2 Ohm Stable

Water resistant design

Conformal coated PCB

Audio detect selectable function – the amplifier turns on when audio is detected and goes to sleep / low power mode when audio is not present

Selectable high pass/ full range setting

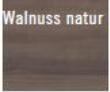

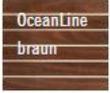

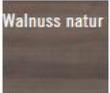

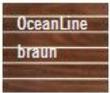

## 16"/19"/22" HD Widescreen LED with DVD

MS-TVxx0LED

FUSION's Marine High Definition Widescreen LED TV's are not just marine by name. The perfect complement to any FUSION entertainment system on-board your vessel, when you're on the water it's important to use electronics that are designed to handle the harsh marine conditions, reducing the risk of corrosion and failure. Internal PCB boards are protected by conformal coating. All TV's come with a 5 meter 12 volt DC power-cable and wall mount bracket.

TRIM CONTROL

TRIM CONTROL & AUTOTACK

# DOCK CONTROL. We do much better!

BAVARIA offers the *most powerful docking system PLUS UNIQUE FEATURES* for the world's market!

BAVARIA **DOCK CONTROL** features an *integrated Full System Monitoring* in combination with a GARMIN chart plotter – for a full overview about the system when in use! The helmsman ALWAYS knows, what the system does.

BAVARIA **DOCK CONTROL** is also *the SAFEST System in the market!* Most rugged RMC swing thrusters for the highest efficiency without compromises to stability and reliability of the thruster units.

BAVARIA **DOCK CONTROL** – *the ultimate Docking System on the market!*

*Boat control on your finger tips.* No more worries in tight marinas or mooring in bad weather conditions. Just use *2 fingers* and *move the boat intuitive* the most reliable and safest possible way!

**BAVARIA Innovations** initiating the basic system and unique for the market integration of products for a clean cockpit and state-of-the-art design of instrumentation.

# DOCK CONTROL. Functionality.

When entering the marina in normal sailing mode under engine – using the joystick for engine control (no more bending and grabbing of the throttle).

Activation of the system by pressing the power button at the joystick – Plotter changes screen into docking monitor indicating

1. Gear (**F**orward, **N**eutral, **R**everse – optimum shift speed certified by Volvo preventing gearbox damages)
2. Throttle (in % - set to Volvo max. rev)
3. Battery Capacity (in Volt both thruster batteries – low voltage alarm)
4. Thruster Status (retracted, moving, deployed – V46 features 2x 6kW)
5. Wheel Brake Status (allowing one more free hand or the wheel use for further mobility) – all while keeping the chart on screen too. UNIQUE in the market!

The helmsman now has the intuitive ability to move the boat by thruster support and using the main engine as a reliable forward and astern power source. Quick, efficient & RELIABLE.

The helmsman has the choice to clearly decide to:

1. use forward, neutral and astern from the main engine – just press the top button of the joystick if/which gears are needed
2. block the steering wheels – depending on mentality of the helmsman it is very convenient to decide if you either want to have the steering wheels blocked or free for extra steering support.
3. course tracker to support maneuvering in the marine under heavy side winds for extra course keeping control.

If the boat speed exceeds 4 knots, the system will send a alarm signal to prevent damage to the thruster lids.

At 5 knots boat speed, the system automatically deactivates and retracts the thruster unit.

In normal cruising mode – system deactivated and thrusters retracted – the joystick takes over the engine control.

**BAVARIA DOCK CONTROL – the ultimate & unique docking system!**

# DOCK CONTROL. System Features.

1. **Full System Monitoring** on a Garmin Plotter UNIQUE to the market:
  1. Gear – forward, neutral reverse
  2. Throttle – in % certified by Volvo Penta
  3. Battery Capacities – in Volt for both separated batteries
  4. Thruster Status – retracted, moving, deployed
  5. Wheel Blocking – activated / free
  6. Easy and intuitive engine control via Joystick in Cruising Mode. No conventional throttle and gear lever in cockpit required
2. **Intuitive Joystick Maneuvering** – just concentrate about where you are and not how to go where you initially wanted to go. Just GO THERE!
3. **RMC Swing Thrusters** for highest but silent efficiency of thrust – unique fitting to the hulls in the safest way preventing breakage and leaking!
4. **Highest thrust** power of systems in the market – in case of the Vision 46 Bavaria specifies 2x 6kW powered units. To give the confidence of a working system in bad weather – when you need
5. **Several Safety Features:**
  1. Joystick panel background illuminated for night use
  2. Clear decision for gear in use. Unique.
  3. Optimum gearshift speed certified by Volvo Penta to prevent gearbox damage but offering the quickest possible gear change. Unique.
  4. Clear decision for a blocked or free wheel. Unique.
  5. Speed Alarm – at 4 knots, retracting and deactivating at 5 knots – to prevent damage to the deployed thruster units when leaving the marina. Unique.
  6. Voltage Alarm – indicating an eventual low battery level giving the helmsman confidence about the system's status. Unique.
  7. All electronic components IP67 rated – including plugs

# TRIM CONTROL . System Features.

Another and **EXCLUSIVE** benchmark BAVARIA Innovations have engineered and developed: The Bavaria TRIM CONTROL System.

Trimming the boat from both helmsman seats per fingertip & push button. No more hassle while tacking, most easiest trimming of jib and mainsail. Get the Superyacht feeling on board a Bavaria yacht!

The intuitive signatures of the panel are illuminated for best possible visibility even when enjoying sailing in darkest nights and bad weather.

Initiated from **BAVARIA Innovations** and developed together with Lewmar & Garmin, the result is an absolute **UNIQUE** feature Bavaria offers her customers and owners.

Trimming mainsail  
Trimming jib on each tack

And:

TACKING the jib with no need to look for a winch handle and line hassle. Just turn the wheel to tack and press the new sheet button. DONE.

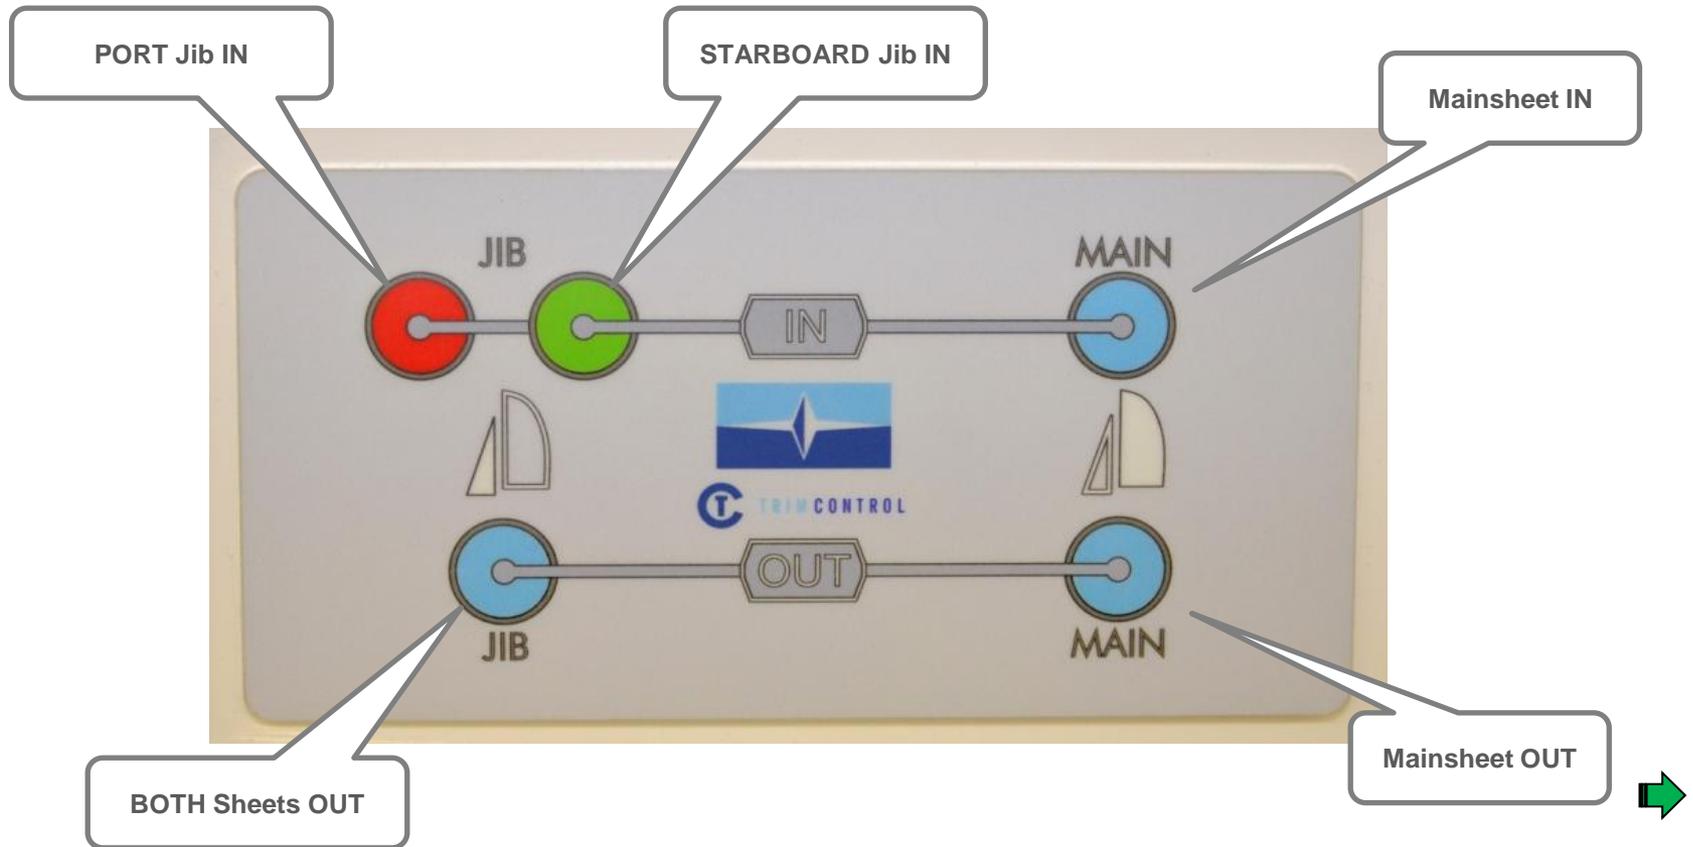

After setting sails lay the sheet lines onto the winches for Mainsheet (Coachroof) and each jib sheet onto the MP2 Winches in the cockpit at her side.

From now on just enjoy push-button-sailing at it's unique best.

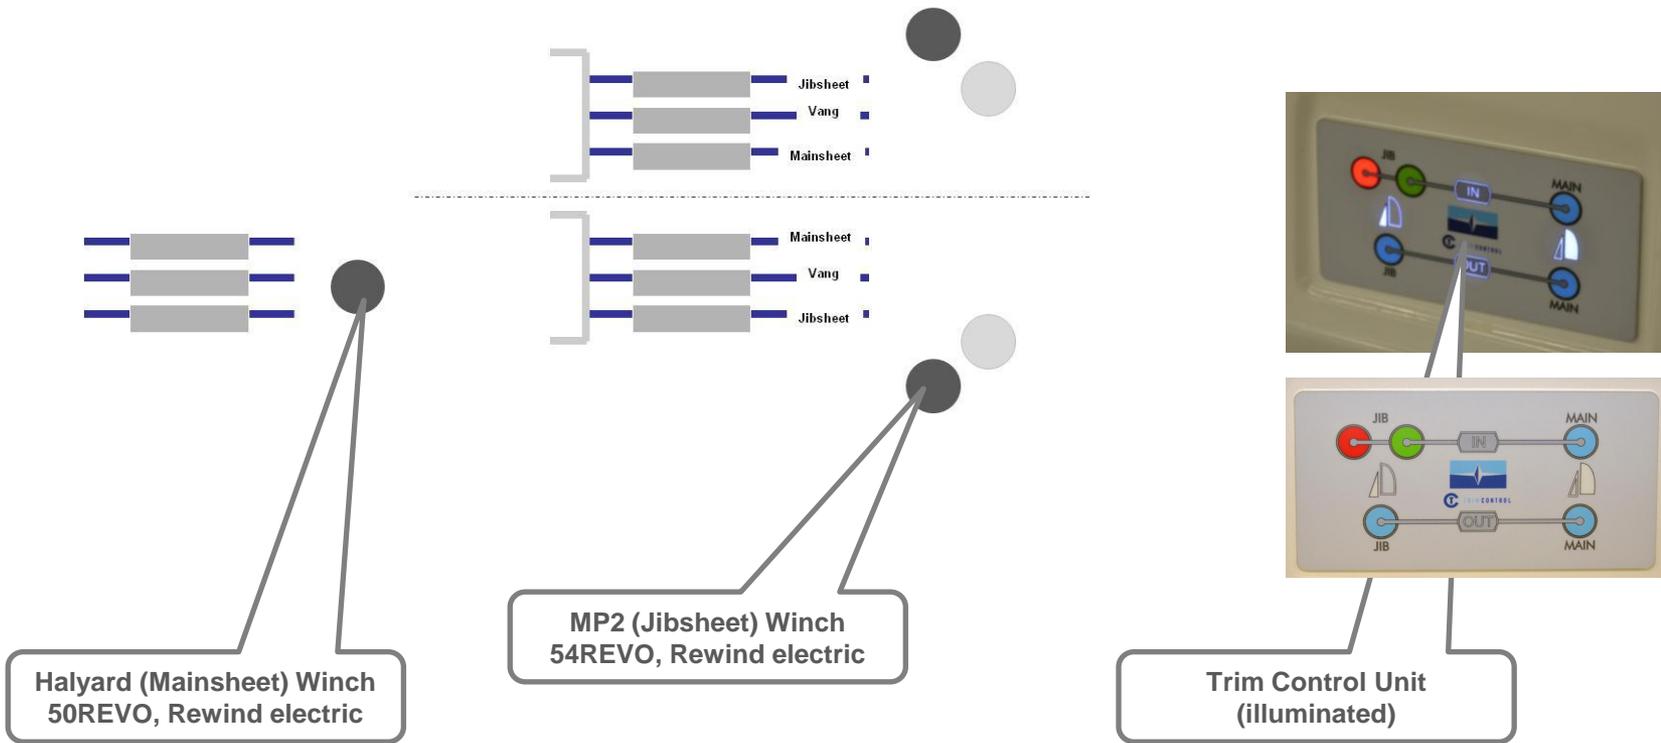

**Simply SAIL!**
