

## FRIEDRICH ZENGERLE

Yachtagency Zengerle

Boat type: Hanse 380

Model: EXTURN 300

Mounting: bow thruster

Location: Fussach (Lake of Constance), Germany

“As owner of a yacht agency and boat service with over 20 years of experience I know the difficulties of conventional thrusters very well. I was interested in EXTURN since the beginning because this solution offers much easier installation and no space requirements in the boat interior. The mounting on a Hanse 380 with the streamlined adapter was a walk-over and accomplished within two hours. In order to measure the ideal position and use the right number of sealings the installation manual was a perfect aid. Also the electrical installation was described very well and could be realized easily.”

“The mounting on a Hanse 380 with the streamlined adapter was a walk-over and accomplished within two hours.”

“In the future I will recommend EXTURN to my customers without any doubts, and I’m looking forward to further easy and unobstructed installations which are assured by this unique development. An improvement of safety on board as simple as never before.”
